Executive Highlights

Top 5 actionable ideas this week

Rank	Company	Signal	Why it matters	Action
1	AF Legal Group (ASX: AFL)	High-significance trade	6.0x significance + purchase worth \$9,585	Read first
2	Environmental Clean Technologies (ASX: ECT)	Multi-signal setup	0.84x significance + stable	Put on shortlist
3	Strata Minerals (ASX: SMX)	Multi-signal setup	1.11x significance + mixed	Put on shortlist
4	Sportshero (ASX: SHO)	Multi-signal setup	1.16x significance + fragile	Put on shortlist
5	Cuscal (ASX: CCL)	Multi-signal setup	0.06x significance + cluster activity + stable	Put on shortlist

Activity snapshot

Trades	Companies	Buys	Sells	Date range
112	76	103	9	2–23 April 2026

What matters this week (read this first)

The most important signal this week is **Truscott Mining (ASX: TRM)**, where sale worth \$1,539 stands out at 10.6x versus recent liquidity, making it the clearest high-conviction trade in the dataset. On the actionable list, **Environmental Clean Technologies (ASX: ECT)** and **Strata Minerals (ASX: SMX)** are the next names to read first, combining meaningful insider activity with setups that are either building or fragile enough to matter if confirmed. **WiseTech Global (ASX: WTC)** adds weight through cluster activity, with multiple insiders participating — a pattern that is typically more informative than a single isolated trade. At the same time, contrarian buying into weak technicals remains a theme. Names such as **3P Learning (ASX: 3PL)** show insiders stepping in before the chart has improved, which increases the importance of execution from here.

Top trades by disclosed value

Company	Director	Trade	Date
Mesoblast (ASX: MSB)	Gregory George	Purchase worth \$15.9m	9–10 April 2026
WAM Leaders (ASX: WLE)	Geoff Wilson	Sale worth \$7.4m	2–14 April 2026
Imdex (ASX: IMD)	Anthony Wooles	Sale worth \$2.0m	14 April 2026
Clarity Pharmaceuticals (ASX: CU6)	Michelle Parker	Sale worth \$1.1m	20 April 2026
3P Learning (ASX: 3PL)	Matthew Sandblom	Purchase worth \$717K	2–17 April 2026
Centuria Capital Group (ASX: CNI)	John Slater	Sale worth \$627K	20 April 2026
Cedar Woods Properties (ASX: CWP)	William Hames	Purchase worth \$592K	7 April 2026
Tamboran Resources (ASX: TBN)	Phil Pace	Purchase worth \$521K	13 April 2026

Top trades by significance (vs 30D liquidity)

Company	Director	Trade	Significance
Truscott Mining (ASX: TRM)	Michael Povey	Sale worth \$1,539	10.6x
3P Learning (ASX: 3PL)	Matthew Sandblom	Purchase worth \$630K	6.0x
AF Legal Group (ASX: AFL)	Peter Johns	Purchase worth \$9,585	6.0x
Frontier Digital Ventures (ASX: FDV)	Luke Elliott	Purchase worth \$419K	4.8x
Stavelly Minerals (ASX: SVY)	Peter Ironside	Purchase worth \$70K	4.5x

The Insider Trader

Company	Director	Trade	Significance
Butn (ASX: BTN)	Cameron Petricevic	Purchase worth \$30K	4.2x
WAM Leaders (ASX: WLE)	Geoff Wilson	Sale worth \$3.8m	4.1x
Asset Vision (ASX: ASV)	Lucas Murtagh	Purchase worth \$20K	2.5x
WT Financial Group (ASX: WTL)	Keith Cullen	Purchase worth \$20K	2.2x
Orbminco (ASX: OB1)	Angus Middleton	Purchase worth \$10K	2.1x

Notable winning trades (last price above trade price)

Company	Director	Trade	Trade value	Score	Return	Held
Titomic (ASX: TTT)	Mira Ricardel	Sell	\$382K	371.4	+28.9%	21d

How to read this report

This report combines disclosed insider trades with rule-based technical signals to help you prioritise what to read first. The labels are mechanical and are not a recommendation.

Term	Meaning
Significance	How large the trade is relative to the company's recent trading liquidity (higher = harder to ignore).
Score	A combined measure of trade significance and subsequent share price performance, increasing when a trade is large relative to liquidity and when the share price has risen since the trade; as a result, the highest scores highlight insider trades that are both meaningful in size and already profitable, and it is best interpreted as a 'conviction x outcome' metric that helps prioritise the most informative signals rather than simply the biggest or best-performing trades in isolation.
Technical score	A rule-based score from common indicators (moving averages, momentum and volume). It drives BUY/HOLD/SELL buckets.
Stability	How persistent the current BUY/HOLD/SELL bucket has been over the last ~20 trading sessions (Stable / Mixed / Fragile).
Cluster	A marker showing repeated insider activity in the same company, either because multiple trades were disclosed or because more than one insider was active over the period.
Contrarian buy	An insider purchase in a stock whose current technical label is SELL or SELL (Strong), highlighting cases where insider buying is running against weak chart signals.
Repeat / cluster activity	A summary of companies where more than one insider was active in the period, intended to flag names where director activity is corroborated by another board or management participant rather than appearing as a one-off event.
Focus list	A shortcut list combining significance, technicals and clusters so you can prioritise which company pages to read first.

About the Technicals

The Buy / Hold / Sell labels in this report are rule-based technical signals calculated from daily price and volume data. They are designed to be consistent and easy to compare across companies, and they do not incorporate fundamentals or news.

Moving averages. Several signals compare shorter-term moving averages to longer-term moving averages (for example, SMA(20) vs SMA(50), SMA(50) vs SMA(200), and SMA(100) / SMA(200)). When the shorter measure is above the longer measure the signal is marked BUY; when it is below it is marked SELL. If data is insufficient to compute a moving average, the signal is marked N/A.

Momentum indicators. RSI(14) is used as a simple overbought / oversold filter. Values above 70 are marked SELL; values below 40 are marked SELL (weak momentum / potential breakdown); values between 40 and 60 are treated as HOLD. MACD is evaluated using the MACD line versus its signal line: above is BUY, below is SELL.

The Insider Trader

Scoring. Each technical contributes +1 for BUY, -1 for SELL, and 0 for HOLD/N/A. The total score is the sum of these contributions and is used to place a company into the Buy / Hold / Sell buckets in the summary table. A higher score means more indicators are aligned in a bullish direction; a lower score means more indicators are bearish.

Stability. Stability summarises how persistent the current BUY / HOLD / SELL bucket has been over the last 20 trading sessions. Stable means the bucket rarely changes and has matched today's bucket most of the time; Mixed indicates occasional flips; Fragile means frequent flips and lower persistence.

Notes. These signals are mechanical and can change as new prices arrive. They should be used as a starting point for further research rather than a standalone recommendation.

Amplitude Energy banks record gas cash flow while ECSP still needs reserves

See also: [Amplitude Energy in the Company Section \(page 90\)](#)

Snapshot: [Bias SELL](#) | [Stability Mixed](#) | [Significance 0.00x](#) | [Cluster No](#)

By Stuart Roberts, April 28, 2026

The business is improving, but the next phase for Amplitude Energy (ASX: AEL) will be decided by whether its growth project can finally convert into booked reserves. The company is generating record cash today from Sole and the Orbost Gas Processing Plant, yet the real upside still rests on the East Coast Supply Project (ECSP) moving beyond concept after two disappointing wells.

That leaves the investment case resting on a simple but unresolved issue: Amplitude has already secured customer demand and infrastructure pathways, but it still needs the subsurface to cooperate before those contracts translate into a final investment decision and tangible reserves.

The April quarter captures both sides of the story

The April quarter brought that trade-off into focus. Revenue reached a record \$74.1m, realised gas prices held at \$10.74/GJ and production totalled 6.86PJ_e, while ECSP remained on track for 2028 first gas.

At the same time, results from Elanora and Isabella showed why the stock continues to trade at a discount despite strong east coast demand for new gas supply. In effect, the company is demonstrating cash generation today, but the growth story remains unproven.

This matters because Amplitude now sits between two valuation anchors: current earnings and future drilling risk. The company has signed two binding foundation gas sales agreements for ECSP, including a deal with AGL for 20PJ over four years, but both remain conditional on drilling success and final investment approval.

Stronger operations have not erased exploration risk

Over the past year, Amplitude's share price has reflected a push and pull between improving operations and mixed exploration outcomes. The February half-year result lifted production guidance to 73-77TJ_e/day and delivered \$141.5m of revenue, \$100.3m of underlying EBITDAX and \$85.6m of adjusted operating cash flow.

Those numbers forced the market to reassess the base business, showing it is not just stable but improving. However, that momentum was offset by ECSP drilling setbacks, with Elanora found to be water-bearing and Isabella later judged non-commercial.

The key implication is that contract wins alone have not been enough to remove the discount. Investors typically require geological risk to clear before assigning full value to gas growth, leaving the stock tied more closely to current earnings and asset life concerns in the meantime.

This is a producing business, not a pure exploration story

Amplitude is not reliant on a single well outcome. It already produces domestic gas and liquids from the Gippsland and Otway basins, with cash flow anchored by the Sole field through Orbost and by the Casino, Henry and Netherby fields via the Athena Gas Plant, alongside oil from the Cooper Basin.

Its model blends longer-term supply contracts with spot market sales into tight east coast markets, while condensate and crude oil provide additional revenue streams. The contract mix helps smooth earnings, and higher contracted gas prices from 1 January 2026 should support margins if production remains stable.

For investors, this positions Amplitude as a domestic gas supplier rather than an LNG-driven growth story, with performance tied more to plant reliability and field output than global pricing cycles.

Why the valuation still reflects caution

The discount in the stock reflects both structural and cyclical factors. Mature fields such as CHN and the Cooper Basin portfolio are in natural decline, and offshore gas developments can take longer and cost more than initially expected.

At the same time, shorter-term variables continue to shape sentiment. Spot gas prices fluctuate, quarterly production depends on plant uptime, and exploration results can overshadow steady operating gains.

Put simply, Isabella being declared non-commercial weighed on confidence, even as ECSP timelines and budgets remained intact and FID was deferred to allow further drilling in the second half of 2026.

ECSP remains the central valuation question

The focus now shifts to whether ECSP can become a financeable brownfield development using existing infrastructure and confirmed customer demand. This is not just about finding gas, but about proving reserves, flow rates, development costs and timing.

Two foundation gas agreements, one fixed-price with CPI escalation and one oil-linked, point to genuine demand for new domestic supply from 2028. However, those contracts only gain full value once backed by proven volumes.

For the market to re-rate the stock, several conditions need to be met. Upcoming wells must support a credible reserve base, management must demonstrate that capital expenditure is manageable, and existing production must bridge the gap to new supply.

The next shift in market perception will come from execution

If drilling in the second half of 2026 delivers success at Juliet, alongside progress at Annie and potentially Nestor, Amplitude could move toward FID with contracts already secured. Additional gas sales agreements, further Orbost debottlenecking and incremental liquids production would strengthen that case.

The downside remains equally clear. Further non-commercial results would raise doubts about scale and timing, while cost pressures, approval delays or faster base decline could erode current cash flow advantages.

From here, the market is likely to focus less on presentations and more on tangible outcomes. Successful wells that convert contracts into bankable volumes will determine whether Amplitude is valued as a declining producer with optionality or as a cash-generating supplier with visible growth.

Pacific Lime and Cement trades below Kido value until commissioning risk clears

See also: [Pacific Lime and Cement in the Company Section \(page 79\)](#)

Snapshot: Bias HOLD | Stability Mixed | Significance 0.03x | Cluster No

By Stuart Roberts, April 28, 2026

Pacific Lime and Cement (ASX: PLA) is moving into a phase where the story shifts from proving the asset exists to proving it can operate as planned. The Central Lime Project at Kido is now backed by a ratified Project Development Agreement, construction is underway, and supporting infrastructure is advancing, yet the stock continues to reflect execution risk rather than underlying project value.

At its core, this is about whether Pacific Lime and Cement can convert a large, increasingly de-risked asset base into first quicklime production in early 2027 without the delays and cost pressures that typically weigh on developers at this stage.

The legal framework has improved, but execution still dominates

The ratification of the Project Development Agreement in March locked in the sovereign, fiscal and regulatory framework for the Kido developments. That removed a major layer of country and permitting uncertainty and changed how investors can assess the asset base.

However, that improved footing does not remove the need to deliver. Construction, power, commissioning and customer execution now carry more weight than the legal structure itself. The company has followed the PDA with a long-term Newmont quicklime offtake and an MOU for dedicated power infrastructure, both of which point to progress toward an operating industrial site.

The market is therefore balancing two realities: the project is more real than it was, but it is not yet producing. That distinction continues to cap how much value is recognised ahead of commissioning.

The share price has tracked milestones, not earnings

Over the past year, Pacific Lime and Cement's share price has been driven by whether it could demonstrate that the Central Lime Project is real, funded and commercially supported rather than by near-term earnings.

The February offtake agreement with Newmont stands out because it covers roughly one-third of nameplate quicklime capacity and provides a tangible anchor for future sales. That shifted the discussion from resource ownership toward demand visibility.

What matters here is that developers typically re-rate as they clear specific hurdles. The January construction update, the March PDA ratification and the April power MOU all contributed to that progression, yet the market has only partially recognised the progress given first production is still targeted for early 2027.

This is a staged industrial build, not a single-asset play

Pacific Lime and Cement is building an integrated lime and cement platform in Papua New Guinea centred on Kido. The immediate focus is the Central Lime Project, which aims to supply quicklime to domestic mining and industrial users, followed by the Central Cement Project, which is targeting a final investment decision in 2026.

The model is structured around import substitution first, with regional export potential later. Quicklime production is intended to establish operations and customer relationships before expanding into clinker and cement manufacturing.

The company also has early limestone rock sales, downstream construction material ambitions and associated infrastructure including an export wharf and quarries. Additional assets include industrial sands, a renewables division, forestry carbon credit interests and a minority stake in Adyton Resources, though these remain secondary to the lime project.

The market is discounting execution, not asset quality

The current share price appears to reflect the typical discount applied to companies transitioning from construction to cash generation. Pacific Lime and Cement holds a large JORC resource, a 99-year state lease, Special Economic Zone status and a funded project under construction.

Structurally, the company has improved its position through the government framework, offtake agreements and cement project preparation supported by IFC advisory work. These developments enhance project quality.

Short-term movements, by contrast, are influenced by market sentiment, liquidity and the volatility often seen in smaller developers. The strategic review of the Star Mountains copper-gold project may unlock value, but it remains secondary to progress at Kido.

Commissioning confidence will determine valuation

The key driver for valuation is confidence that the Central Lime Project will commission in Q1 2027 and begin supplying quicklime into both contracted and broader industrial demand.

Resource size, land position and future cement potential are relevant, but they remain secondary until production is proven. Investors typically assign higher valuations once output and sales are demonstrated rather than inferred.

For the investment case to strengthen, construction must stay on schedule and budget, power arrangements need to become definitive, and additional customer agreements would improve visibility. Clarity on working capital will also matter.

Upside exists, but proof will be required

The upside scenario depends on Pacific Lime and Cement becoming a domestic producer in a market that still imports key materials. If the lime plant begins operating as planned and infrastructure is delivered, the company could transition from being viewed as a developer to an emerging industrial producer.

A successful 2026 final investment decision on the cement project, particularly with IFC-backed feasibility and ESG work, would add a second growth layer.

The downside risks remain typical of development projects: delays, cost increases, slower commercial uptake and infrastructure challenges, particularly around power and commissioning.

From here, the market is likely to focus on visible progress toward first quicklime production and early supply, as that will ultimately determine whether the current discount to project value closes.

Tamboran Resources Corporation buys time as first gas still decides Beetaloo value

See also: [Tamboran Resources in the Company Section \(page 92\)](#)

Snapshot: Bias HOLD | Stability Fragile | Significance 0.45x | Cluster No

By Stuart Roberts, April 28, 2026

After securing up to US\$198m in fresh equity, Tamboran Resources Corporation (ASX: TBN) is entering a phase where funding pressure has eased, but the core question remains unchanged: can the Shenandoah South Pilot Project deliver first gas in 3Q 2026 and unlock the value embedded across its Beetaloo Basin position and 40 MMcf/d Northern Territory Government contract?

That leaves the investment case resting on whether early technical success and improved liquidity can translate into sustained production and contracted cash flow, rather than remaining a pre-revenue story defined by drilling results and capital markets access.

The balance sheet is stronger, but execution risk still dominates

The late-April capital raising materially reduces near-term funding strain and is intended to carry Tamboran through to 2028 as it continues drilling and advancing the Beetaloo program. For a company without material revenue, that access to capital directly shapes how investors value the asset base.

Even so, the improvement in funding does not change the operational demands. Tamboran still needs to complete wells, tie them into the compression facility and reach first sales on schedule. The record SS-6H flow result and completed Sturt Plateau Pipeline point to progress, but they do not yet prove commercial delivery.

Investors are therefore weighing a large, high-potential acreage position against the usual development risks, including delays, further capital requirements and the fact that commercial proof remains ahead rather than behind.

Proof points have driven sentiment, but dilution remains a constraint

Over the past year, the share price has reflected changing confidence in whether Beetaloo gas can move from concept to cash flow. The combined equity raise and entitlement offer completed on 27 April 2026 addressed a major overhang by funding drilling, appraisal and working capital during a period of recurring losses and negative cash flow.

However, that funding came at the cost of dilution. New equity issuance can limit how quickly the market capitalises future upside, particularly before first revenue is established. The 2 April SS-6H result, with a record IP20 flow of 10.3 MMcf/d, reinforced the technical case for production, but it is not sufficient on its own to re-rate the stock.

What matters here is whether that capital now converts into visible construction progress, tied-in wells and a credible pathway to first gas rather than extending the development timeline.

This is a basin development story, not a producing asset yet

Tamboran operates as an independent gas exploration and production company, but in practical terms it is building out an entire basin rather than running a conventional upstream operation. The Shenandoah South Pilot Project is the first step toward monetisation, supported by compression, pipeline infrastructure and longer-term LNG ambitions at Middle Arm in Darwin.

The integrated approach reflects the reality that remote gas cannot be monetised through drilling alone. Processing and transport infrastructure must be in place before production translates into revenue.

In the near term, planned pilot gas sales into the Northern Territory market, anchored by a 40 MMcf/d take-or-pay government contract through to mid-2041, provide a pathway to initial cash flow, with upside if volumes increase toward the targeted 100 MMcf/d level over time.

The valuation reflects both progress and the standard early-stage discount

Tamboran's current valuation captures genuine strategic progress alongside the discount typically applied to pre-revenue developers. The company controls a large Beetaloo acreage position, has reported strong well productivity, completed the Sturt Plateau Pipeline in 1Q 2026 and has the compression facility 84% complete ahead of first gas.

It has also secured third-party validation through the DWE farm-in across parts of the Pilot Area and BCDA, which contributes non-dilutive funding and supports the perceived value of the acreage.

Against that, the risks remain clear: no proved reserves, no material revenue, basin concentration and exposure to drilling, completion and infrastructure execution risk. The Falcon acquisition could expand net acreage to around 2.9 million acres and simplify the joint venture, but it also introduces integration and completion risk.

Moving from flow results to cash flow is the critical step

The key implication is that valuation will ultimately be driven by Tamboran's ability to convert strong well results into sustained, contracted gas sales from 3Q 2026. The SS-6H result supports the technical case, but the broader investment thesis depends on repeatability across additional wells and timely integration into the compression facility.

Execution across SS-3H, SS-4H, SS-5H and future wells such as SS-7H and SS-8H will determine whether the initial results represent a scalable outcome rather than an isolated success.

At the same time, the company must demonstrate that its strengthened balance sheet and farmout arrangements can limit the need for further near-term equity raises.

Operational delivery remains the trigger for re-rating

The upside case rests on Tamboran transitioning from a capital-intensive explorer to a funded gas developer with visible offtake as pilot wells continue to perform and the first sales phase begins.

A successful Falcon completion and progress on an Orion farmout by mid-2026 could reinforce that trajectory by expanding acreage exposure and assigning external value to additional assets.

The downside remains tied to delays, weaker well outcomes or further funding gaps, any of which could undermine confidence given the absence of existing cash flow.

From here, the market is likely to focus on first gas in 3Q 2026, additional Shenandoah well results, EP 161 drilling and the practical performance of the integrated midstream plan as the key signals that will determine whether Tamboran closes its valuation gap.

Wagners Holding Company rerating depends on turning new capacity into repeatable earnings

See also: [Wagners in the Company Section \(page 100\)](#)

Snapshot: Bias BUY | Stability Mixed | Significance 0.06x | Cluster No

By Stuart Roberts, April 28, 2026

The next phase for Wagners Holding Company (ASX: WGN) will be decided by whether recent expansion across concrete plants and Composite Fibre Technologies can convert into consistent earnings, even as H2 faces softer seasonal volumes, contract roll-offs and pressure from clinker and shipping costs.

That leaves the investment case resting on whether newly commissioned assets such as Slacks Creek and Wulkuraka, alongside growth in Composite Fibre Technologies, can shift the business from a strong half-year performance to a repeatable earnings profile.

Earnings momentum is real, but H2 introduces a tougher test

The 24 February H1 FY26 result reset expectations. Revenue rose 12% to \$251.7m, operating EBIT increased 72% to \$35.0m and NPAT climbed 70% to \$21m, prompting management to upgrade full-year operating EBIT guidance to \$62m to \$66m.

That upgrade mattered because it demonstrated that earnings growth was broad-based rather than isolated to a single segment. However, the stronger first half also raises the hurdle for the second half, where softer volumes, timing effects and cost pressures are expected to weigh on performance.

The issue is simple. Wagners must now show that the momentum seen in H1 can carry through a more challenging operating period rather than proving to be a one-off uplift.

The rerating has followed delivery, not speculation

Over the past year, the share price has increasingly reflected a shift from expectation to confirmation. The first signal came in November, when management introduced FY26 EBIT guidance of \$52m to \$56m, indicating stronger-than-anticipated trading conditions.

The February result then reinforced that view by both validating and upgrading guidance. That sequence matters because it suggests management has visibility into demand and pricing rather than relying on favourable short-term conditions.

What matters here is that the stock is no longer being valued on potential alone. It is now judged on whether Wagners can continue converting volume growth, pricing discipline and plant utilisation into sustained profit growth.

A diversified and integrated model underpins growth

Wagners operates across three core segments: Construction Materials, Project Services and Composite Fibre Technologies. Its asset base spans cement, concrete, aggregates, quarries, reinforcing steel, haulage and specialised composite products, creating a vertically integrated model.

That integration supports supply control and margin resilience, particularly in active construction markets. Expansion through Slacks Creek and Wulkuraka strengthens its position in South-East Queensland, while Composite Fibre Technologies adds exposure to utility and infrastructure demand rather than housing cycles alone.

Project Services introduces cyclicalities, but it also supports network utilisation and customer relationships, particularly when contract pricing remains disciplined.

Operational progress is clear, but earnings remain uneven

Several structural improvements have driven recent performance. Construction Materials revenue rose 21% to \$156.5m in the half, supported by cement volume growth of 10%, concrete volume growth of 57% and quarry volume growth of 10%.

That performance reflects more than a cyclical recovery. It indicates that Wagners is increasing network density and extracting value from recently commissioned capacity.

However, variability remains. Project Services revenue and EBIT are expected to decline in H2 as bulk haulage contracts complete, while Composite Fibre Technologies faces lower H2 volumes and weaker-than-expected US performance. Cost pressures from clinker, shipping, weather and approvals also remain in play.

Returns on new capacity will drive the next leg of valuation

The key implication is that valuation will hinge on how effectively Wagners generates returns from its expanding asset base. Investors are likely to focus on utilisation at Slacks Creek and Wulkuraka, progress at planned sites such as Caboolture and Rocklea, and the ability of quarries and cement operations to support throughput without margin erosion.

At the same time, Composite Fibre Technologies needs to continue scaling as a meaningful earnings contributor. The September 2025 \$30m capital raise supports this expansion, and the shift from net debt to net cash provides flexibility.

For investors, the test is whether growth capital is now compounding across a broader earnings base rather than simply adding capacity.

Delivery will determine whether the growth story holds

There is a credible growth case. Demand in South-East Queensland construction, long-term supply and haulage contracts extending to 2030, and ongoing demand for utility composites such as power poles and crossarms all provide support.

Additional catalysts include Pinkenba upgrades, quarry development and continued expansion of Composite Fibre Technologies in Australia and the US, offering a pipeline of operational drivers.

The downside is tied to execution. H2 performance could be affected by seasonal slowdowns, project timing, weather and input costs, while US Composite Fibre Technologies must still demonstrate improvement through custom-build work and efficiency gains.

From here, the market is likely to focus on whether Wagners delivers within upgraded FY26 guidance and demonstrates that new capacity is generating sustainable returns, as that will determine whether the stock continues to rerate or settles back into a more cyclical profile.

What to do: Setup Early | Signal strength Weak | Positioning Watch.

Positioning: Horizon Long-term | Trigger: Confirmation of upward trend | Risk: Breakdown in technical support or insider inactivity.

Viva Energy Group (ASX: VEA)

About Viva Energy Group: Viva Energy Group supplies, refines, imports, distributes and retails fuels, lubricants and convenience products. Its core asset is the Geelong Refinery, which produces petrol, diesel, jet fuel and other refined products, complemented by import terminals, storage infrastructure and a national logistics network. The company markets Shell-branded fuels under a long-term licensing arrangement and operates a large service-station and convenience network through Coles Express and OTR formats. Viva Energy also serves commercial, industrial, aviation, marine, mining and transport customers, and is expanding in energy and mobility through electric vehicle charging and related services. Revenue is generated from refining margins, wholesale fuel supply, retail fuel sales and in-store convenience earnings.

Sims (ASX: SGM)

About Sims: Sims (ASX: SGM) operates a global metals and electronics recycling network, with major activities in ferrous and non-ferrous scrap processing, post-consumer electronics recovery and municipal recycling services. Founded in Sydney, the group collects, buys, processes and sells recycled steel, aluminium, copper and other metals from industrial, commercial and public sector suppliers, supplying steel mills, foundries and manufacturers in North America, the UK, Europe, New Zealand and Asia. Its Sims Lifecycle Services unit provides reuse, refurbishment, redeployment and secure data destruction for IT assets, while Sims Resource Renewal develops circular economy solutions that recover materials from difficult waste streams. Facilities include shredding, shearing, sorting, brokerage, export logistics and downstream processing that support scale and market access. The business sits within essential recycling and resource recovery chains, linking waste generators with end users seeking secondary raw materials and compliant disposition of electronic equipment. (28.04.26).

Mesoblast (ASX: MSB)

About Mesoblast: Mesoblast (ASX: MSB) develops allogeneic cellular medicines built around its mesenchymal lineage cell platform, led by Ryoncil, an off-the-shelf stem cell therapy used for steroid-refractory acute graft versus host disease. Its pipeline also includes candidates targeting inflammatory conditions, cardiovascular disease and chronic low back pain associated with degenerative disc disease, with rexlemestrocel-L among the best known programs. Operations span product development, clinical testing, manufacturing and regulatory engagement, with commercial and partnering activities extending across the United States, Europe and Asia. Rather than serving a single niche, Mesoblast occupies a specialist position in regenerative medicine and immunomodulation, using donor-derived cell products intended to be manufactured at scale and delivered without patient-specific preparation. That model aims to combine biologic complexity with broader clinical accessibility, distinguishing the group from autologous cell therapy developers and placing its value in proprietary platforms, know-how and product rights. (28.04.26).

Dalrymple Bay Infrastructure (ASX: DBI)

About Dalrymple Bay Infrastructure: Dalrymple Bay Infrastructure (ASX: DBI) owns and operates the Dalrymple Bay Terminal at Hay Point, near Mackay in Queensland, one of the world's largest metallurgical coal export terminals. The terminal provides shiploading and related port infrastructure for coal producers in the Bowen Basin, linking mine supply chains to global steelmaking customers through rail receipt, stockyard management and vessel loading services. Its earnings are underpinned by a regulated asset base and long-term take-or-pay arrangements, reflecting the essential role of the facility within the east coast bulk export network. DBI also undertakes sustaining and expansion works intended to preserve reliability, safety and throughput while supporting users' logistics requirements. With a single, strategically located asset handling substantial volumes for multiple producers, the business occupies a critical position in Queensland's export infrastructure and offers investors exposure to contracted port services tied to seaborne metallurgical coal trade flows. (28.04.26).

Premier Investments (ASX: PMV)

About Premier Investments: Premier Investments (ASX: PMV) owns and operates a portfolio of retail brands led by Smiggle and Peter Alexander, with trading footprints across Australia, New Zealand, Singapore, Malaysia, the United Kingdom and Ireland. Smiggle specialises in children's stationery, accessories and school-related products, while Peter Alexander focuses on sleepwear, loungewear and gifting. The group also holds interests associated with apparel retailing through brands such as Just Jeans, Jay Jays, Portmans, Dotti and Jacqui E, spanning youth, denim and women's fashion segments. Earnings are shaped by store networks, online sales, merchandise sourcing, brand development and inventory management across physical and digital channels. Premier Investments also has a long-standing investment portfolio alongside its retail operations, adding exposure beyond specialty retail. Its market position rests on established brand recognition, multi-brand merchandising capability and experience managing store estates and e-commerce platforms across several consumer categories and geographies. (28.04.26).

About Terry McCartney. Terry McCartney has been a director of Myer (ASX: MYR) since November 2022 and of Premier Investments (ASX: PMV) since April 2016. McCartney has had a long career in retail. He started at Boans Department Stores in Perth then moved to Grace Bros in Sydney. After the acquisition of Grace Bros by Myer, he relocated to the merged Department Stores Group in Melbourne within the merchandise and marketing department. His successful career within Coles Myer meant that McCartney then moved to the Kmart discount department stores as Head of Merchandise and Marketing and then Managing Director. Following several years as Managing Director of Kmart Australia and New Zealand, McCartney became Managing Director of Myer Grace Bros. For five years McCartney led year-on-year growth in profitability of Australia's largest department store. McCartney's experience spans the full spectrum of retailing, ranging from luxury goods in department stores to large mass merchandise discount operations. McCartney has also been retained by large international accounting and legal firms as an expert witness in relation to Australian retail. (30.09.25).

Imdex (ASX: IMD)

About Imdex: Imdex develops mining technology that helps drillers and resource companies find, define and extract orebodies more efficiently. Its product suite includes downhole survey instruments, core orientation tools, drilling optimisation systems, cloud-connected subsurface data platforms and orebody knowledge software used across exploration, mining and geotechnical workflows. The company generates revenue by selling instruments and consumables, providing software and digital subscriptions, and delivering related services that embed its tools into customers' drilling programs. Recent acquisitions of Datarock and Advanced Logic Technology expand Imdex's capabilities in geological data interpretation, hyperspectral analysis and real-time drilling intelligence, strengthening its integrated mining technology offering.

Perenti (ASX: PRN)

About Perenti: Perenti (ASX: PRN) provides mining services through underground and surface contract mining, drilling, explosives, and support activities for gold and base metals operations. Trading under brands including Barmenco, Ausdrill, African Mining Services and idoba, it works across mine development, production drilling, load and haul, grade control, blast design, exploration drilling and mining technology. Operations span Africa, Canada and Latin America as well as Australia, with long-established exposure to underground gold mines and open-pit projects serving major and mid-tier resource producers. Its drilling arm covers reverse circulation, diamond and blast hole work, while technology and advisory capabilities support mine planning, operational improvement and digital systems for site productivity and safety. Earnings are linked to long-term service contracts, equipment fleets, technical capability and workforce management in jurisdictions where scale and execution matter. The group occupies a meaningful place in contract mining and drilling markets with diversified commodity and geographic exposure. (28.04.26).

Bega Cheese (ASX: BGA)

About Bega Cheese: Bega Cheese (ASX: BGA) produces branded dairy and food products anchored by the Bega brand and a broad processing network spanning cheese, milk, infant and nutritional powders, and grocery staples. Operations include milk intake and manufacturing across regional New South Wales and Victoria, with activities in natural cheese, processed cheese, butter, cream, yoghurt, drinking milk and bulk ingredients supplied to retail, foodservice and export channels. Its grocery and spreads range includes peanut butter, Vegemite and related pantry lines, adding scale beyond dairy. The group also handles contract manufacturing and ingredient sales, linking farmgate milk supply with consumer packaged goods and business-to-business markets. Well-known labels across the portfolio include Bega, Vegemite, Dairy Farmers, Pura, Dare and Farmers Union, supporting distribution through supermarkets, convenience outlets and institutional customers. This mix gives Bega Cheese exposure to everyday food categories and a meaningful role in the domestic dairy supply chain. (28.04.26).

Emerging

Freelancer (ASX: FLN)

About Freelancer: Freelancer operates online marketplaces that connect businesses and governments with freelance talent and crowd workers for projects ranging from software development and design to data labeling, testing, and security tasks. Its core assets are the Freelancer.com marketplace, the Escrow.com online payments and transaction platform, and Loadshift, a heavy-haul freight marketplace. The company earns revenue from project and contest commissions, membership subscriptions, paid marketplace upgrades, escrow and payment processing fees, and freight marketplace charges. Freelancer also serves enterprise and public-sector clients through curated talent sourcing and crowd work solutions, leveraging its large global user base and transaction infrastructure.

About Matt Barrie. Matt Barrie founded Freelancer (ASX: FLN) in 2009 and remains its CEO. Barrie founded Freelancer after many years in technology. In the late 1990s, he worked at Kroll O’Gara, an information security group in the Bay Area, and from 2001 to 2007 he was Sydney-based CEO of Sensory Networks, an OEM provider of network security acceleration technology. Freelancer was born after Barrie left that company, burned out but looking for his next idea. Helping his mother with her wholesale florist business, he realised he could hire an army of remote freelancers for the business with just his credit card. Barrie then proceeded to aggregate numerous freelancer businesses to create Freelancer.com. He took the company public in 2013 with a billion-dollar market capitalisation. Barrie’s former company, Sensory Networks, was able to grow off his early work to be sold to Intel in 2013. At the time Barrie started Freelancer he was an Adjunct Associate Professor at the Department of Electrical and Information Engineering at the University of Sydney where he taught cryptography for fifteen years and, later, technology venture creation. He is the co-author of over 20 US patent applications. Barrie is a prolific speaker globally and has headlined at SXSW, The Summit Series, Tony Robbins, The Next Web, the New York Times, Bloomberg TV, Wall Street Journal, TechCrunch, BRW and the Economist. In 2006, he was awarded the State Pearcey Award for contribution to the IT&T industry. In 2010 he was named Alumnus of the Year for the Faculty of Engineering and IT at the University of Sydney. In 2011 he was

The Insider Trader

named inaugural BRW Entrepreneur of the Year, by Australia's most prestigious business publication as well as the Ernst & Young Technology Entrepreneur of the Year. In 2016 he was awarded Libertarian of the Year by the Australian Libertarian Society. Barrie was educated at Sydney Grammar School and at the University of Sydney, where he graduated in 1994 with a Bachelor of Science with First Class Honours in Computer Science and Physics and in 1996 with a Bachelor of Engineering with First Class Honours in Electrical Engineering. He gained his Master of Science in Electrical Engineering from Stanford University in 1998. Barrie also has a Master of Applied Finance degree from Macquarie University, gained in 2009, where he won the J.P. Morgan Prize for Mining Investment Analysis. (11.03.25).

Life Sciences

Clarity Pharmaceuticals (ASX: CU6)

About Clarity Pharmaceuticals: Clarity Pharmaceuticals (ASX: CU6) develops radiopharmaceutical products built around its SAR technology, with lead candidate SAR-bisPSMA targeting prostate cancer for both imaging and treatment. Its pipeline spans copper-64 diagnostic agents and copper-67 therapeutic agents designed to pair tumour detection with targeted radiation delivery, including programs aimed at neuroblastoma and other solid tumours. Operations cover research, clinical development, manufacturing process development and the supply chain requirements needed for short-lived isotopes, with work directed toward improving lesion detection, patient selection and theranostic treatment pathways. Clarity's approach uses proprietary chelators intended to securely hold copper isotopes and support product stability, imaging quality and therapeutic delivery. The business sits within nuclear medicine and precision oncology, where value depends on advancing candidates through trials, securing regulatory approvals and establishing clinical adoption across specialist cancer centres in markets such as North America and Europe, alongside its home market. (28.04.26).

Vita Life Sciences (ASX: VLS)

About Vita Life Sciences: Vita Life Sciences (ASX: VLS) develops, manufactures and distributes vitamins, minerals, supplements and over-the-counter health products, with its Herbs of Gold brand a leading asset in practitioner and retail channels. The group also markets labels including VitaScience and Vital, serving consumer wellness categories such as immunity, bone and joint health, pregnancy and infant care, and general nutrition. Operations span product formulation, sourcing, packaging, brand management, sales and distribution, giving it control across much of the value chain rather than acting only as a brand owner. Key markets include Australia, Singapore and other parts of South East Asia, with products sold through pharmacies, health food stores, supermarkets, practitioners and online channels. Its market position rests on established brand recognition, broad retail relationships and exposure to everyday health demand rather than a single therapeutic niche, supporting income from repeat consumer purchases across multiple geographies and categories. (28.04.26).

Imugene (ASX: IMU)

About Imugene: Imugene (ASX: IMU) develops cancer immunotherapies led by CF33, an oncolytic virus platform being advanced in multiple forms including VAXINIA, CHECKvacc and other constructs designed to infect tumours and stimulate anti-cancer immune responses. Its pipeline also includes HER-Vaxx, a B-cell peptide vaccine targeting HER2-positive cancers, PD1-Vaxx, aimed at the PD-1 checkpoint pathway, and azer-cel, an allogeneic CAR T cell therapy program for blood cancers. Operations span preclinical and clinical development, manufacturing oversight, trial execution and collaboration with hospitals, research groups and specialist biotech partners. Imugene's work sits within immuno-oncology, where value depends on translating novel biological mechanisms into clinically differentiated treatments that can be partnered, licensed or taken further through development. The business is structured around platform technologies intended to generate multiple product candidates across solid tumours and haematological malignancies, with activity extending beyond one disease setting or single therapeutic modality. (28.04.26).

Technology

Data#3 (ASX: DTL)

About Data#3: Data#3 (ASX: DTL) provides information technology solutions and services, with a long-standing focus on cloud, modern workplace, security, data and analytics, networking and managed services. Operations span software licensing, procurement, consulting, project delivery, support and lifecycle management for enterprise and government customers, with a business model built around technology advisory work and recurring service relationships. The group is closely associated with Microsoft, Cisco, HP and other major vendors, and is recognised for integrating hybrid cloud, collaboration, cyber security and infrastructure platforms into practical operating environments. Its service capability includes architecture, migration, adoption, service desk, asset management and training, alongside maintenance and annuity-style software arrangements. Headquartered in Brisbane, Data#3 serves organisations across Australia and supports customers in sectors such as public administration, education, health, utilities and corporate enterprise, positioning it as a broad-based IT partner rather than a single-product provider. Etherstack plc (ASX: ESK)

About Etherstack plc: Etherstack plc (ASX: ESK) develops and supplies wireless communications software and network solutions for mission-critical radio users, with a core position in digital land mobile radio standards including APCO P25 and DMR. Its products support call control, interoperability, dispatch, voice and data services, and secure network management for public safety, utilities, transport, defence and enterprise customers. Operations span software licensing, systems integration, network design and ongoing support, with deployments and customers across the United Kingdom, North America, Asia and other international markets. Etherstack is known for radio core network technology, base station systems and interoperability gateways that connect legacy and modern communications environments. It also provides managed services and engineering capability for complex communications infrastructure, helping agencies operate resilient private mobile radio networks where coverage, reliability and security are essential. The business is positioned as a specialist supplier to organisations running high-availability critical communications systems. (28.04.26).

Infotrust (ASX: ITS)

About Infotrust: Infotrust (ASX: ST1) operates as an information technology and cybersecurity services provider serving enterprise and government clients, with work spanning managed security, cloud and infrastructure support, consulting and project delivery. Its offering typically covers cyber advisory, governance and risk, security operations, network and endpoint protection, identity and access management, data and systems integration, and ongoing managed services for complex environments. Demand is supported by organisations that need external expertise to strengthen resilience, maintain critical systems and manage evolving digital security obligations. Infotrust's role in the market is as a specialist partner that combines technical implementation with operational support, helping customers design, secure and run core technology platforms rather than supplying a single packaged product. Engagements are generally relationship based and service led, with earnings linked to consulting assignments, recurring support arrangements and outsourced technology functions across a diversified client base. (28.04.26).

Gemlife Communities Group (ASX: GLF)

About Gemlife Communities Group: GemLife Communities Group (ASX: GLF) develops, owns and operates land lease communities for over-50s residents, with home and resort-style living precincts in Queensland, New South Wales and Victoria. Its estates typically combine manufactured homes with shared amenities such as clubhouses, pools, bowling greens, gyms and wellness facilities, aimed at owner-occupiers seeking lower-maintenance housing and community-based living. GemLife also provides development management and estate operations across site acquisition, planning, construction, home sales and ongoing management, giving it control over the resident offering and community standards. Well-known locations include GemLife Gold Coast, GemLife Rainbow Beach, GemLife Palmwoods and GemLife Woodend, alongside other branded communities in coastal and regional markets. Earnings are shaped by home settlements, development margins and recurring site-related income from established estates, while the group's integrated model positions it within the growing lifestyle resort and land lease housing segment for downsizers and active retirees. (28.04.26).

About Mark Fitzgibbon. Mark Fitzgibbon has been a director of Gemlife Communities Group (ASX: GLF) since June 2025. Fitzgibbon was CEO of NIB Holdings (NHF) from October 2002 to December 2024. In 2007 he led NIB through its demutualisation and listing on the ASX. Fitzgibbon has held executive positions at several large Australian organisations, including local government councils and peak bodies. Under Fitzgibbon's leadership NIB moved from being a private health insurer with a regional focus in the Newcastle area of NSW into one of Australia's fastest growing and innovative health funds. Fitzgibbon has previously served as CEO of both the national and NSW peak industry bodies for licensed clubs, as well as holding several General Manager positions in local government. Fitzgibbon is currently a Non-Executive Director of the Sport Australia Hall of Fame and a member of the J.P. Morgan Australian Advisory Council. He has a Master of Arts from Macquarie University and an MBA from the University of Technology Sydney. (18.11.25).

Centuria Capital Group (ASX: CNI)

About Centuria Capital Group: Centuria Capital Group (ASX: CNI) is a property funds manager and investment platform with established exposures to office, industrial, healthcare and agricultural assets, alongside tax-effective investment bond businesses in Australia and New Zealand. Its operations span listed and unlisted real estate funds, direct property co-investments, asset and development management, and institutional and private investor products. Well-known holdings have included metro office buildings, logistics and industrial facilities, medical and day hospital properties, and orchards and other farming assets assembled through its agriculture platform. Earnings are supported by recurring management fees, property income from balance sheet interests, and administration of investment bonds distributed through advisers and wealth channels. Centuria's role in the market combines real asset origination, active tenancy and asset management, capital raising, and long-duration stewardship for wholesale and retail investors seeking income, diversification and exposure to commercial property and related alternatives across Australia and New Zealand. About Mark Vaile. The Hon. Mark Vaile AO has been Chairman of Whitehaven Coal (ASX: WHC) since May 2012, after Whitehaven acquired Aston Resources (AZT) where he had been Chairman since November 2009. He has been a director of ServCorp (ASX: SRV) since June 2011. He was a director of Virgin Australia (VAH) from September 2008 to December 2018. He was Chairman of SmartTrans (SMA) from April 2016 to June 2018 and of CBD Energy (CBD) from September 2008 to January 2013. Vaile was a National Member of the House of Representatives in the Australian Parliament as Member for the New South Wales division of Lyne from 1993 to 2008. In the government of Prime Minister John Howard, he was Minister for Transport and Regional Development in 1997 and 1998, Minister for Agriculture, Fisheries and Forestry in 1998 and 1999, Minister for Trade and Investment from 1999 to 2006 and Minister for Transport and Regional Development again in 2006 and 2007. He was Deputy Leader of the National Party from 1999 to 2005 and Leader from 2005 to 2007. Vaile resigned from Parliament after the 2007 Australian federal election. Prior to entering Parliament Vaile worked as a farm

The Insider Trader

machinery retailer and stock and station and real-estate agent. As Deputy Prime Minister of Australia and Leader of the National Party Vaile established an extensive network of contacts throughout Australia and East Asia. His focus at home was with regional Australia and particularly northern NSW. As one of Australia's longest-serving Trade Ministers Vaile led negotiations which resulted in Free Trade Agreements being concluded with the US, Singapore and Thailand as well as launching negotiations with China, Japan, and ASEAN. Importantly, early in his ministerial career as the Minister for Transport and Regional Services, Vaile was instrumental in the establishment of the ARTC which operates the Hunter Valley rail network. Vaile is currently a director of Stamford Land (SGX: H07). Vaile was named an Officer of the Order of Australia (AO) in the Queen's Birthday 2012 Honours List for distinguished service to the Parliament of Australia, through support for rural and regional communities, to the pursuit of global trade and investment opportunities, and to the citizens of the Taree region. (27.02.25).

Cedar Woods Properties (ASX: CWP)

About Cedar Woods Properties: Cedar Woods Properties develops and invests in residential communities and commercial property projects. Its core assets are a pipeline of masterplanned estates, medium-density and apartment developments, plus selected commercial and industrial sites held for development or sale. The group manages the full value chain from land acquisition, planning and subdivision through construction oversight, marketing and settlement, allowing it to realise development margins and recycle capital across projects. Revenue is generated primarily from lot and dwelling sales, apartment settlements, and profits on completed commercial developments, with additional income from property holdings and project-related management activities across key urban growth corridors.

Finbar Group (ASX: FRI)

About Finbar Group: Finbar Group (ASX: FRI) is a Perth-based property developer and apartment builder best known for medium and high-density residential projects in Western Australia. Its work is concentrated in metropolitan Perth, where it develops, constructs and sells apartment communities, including projects in inner-city and riverside precincts such as East Perth, South Perth, Rivervale and Applecross. The group commonly manages the full delivery chain from site acquisition and design coordination to construction, settlement and, in some cases, retained rental or commercial holdings. Finbar has an established presence in strata-titled apartment development and is recognised in the local market for multi-storey residential towers and mixed-use schemes that combine dwellings with ground-floor retail or other ancillary space. Earnings are principally derived from development margins on completed apartment sales, supported by construction capability and a long-standing focus on Perth's urban infill market and owner-occupier and investor demand. (28.04.26).

WOTSO (ASX: WOT)

About WOTSO: WOTSO Property (ASX: WOT) operates flexible workspace and serviced office locations under the WOTSO brand, with sites across Sydney, Melbourne, Brisbane, Canberra, Adelaide, the Gold Coast, Sunshine Coast and regional centres, and a presence in New Zealand and Singapore. Its offer includes private offices, coworking desks, meeting rooms and enterprise space, typically supported by month-to-month memberships and service agreements that appeal to small businesses, remote teams and larger occupiers seeking decentralised premises. The group combines hospitality-style amenity with workspace management, fitting out and operating centres in suburban and metropolitan markets rather than relying only on CBD towers. Earnings are supported by occupancy, membership fees and related workspace services, while the operating model emphasises flexible terms and local network density. WOTSO Property also owns interests in some properties used by its centres, adding an investment property element alongside the operating platform. (28.04.26).

About Seph Glew. Seph Glew has been a director of Blackwall (ASX: BWF) since October 2010 and of Wotso (ASX: WOT) since June 2009. Glew has worked in the commercial property industry in New Zealand, the US and Australia and has driven large-scale property development and financial structuring for real estate for over 40 years. In addition, since the early 1990s, Glew has run many 'turn-around' processes in relation to distressed properties and property structures for both private and institutional property owners. While working for the Housing Corporation of New Zealand and then AMP, Glew qualified as a registered valuer. In the 1980s he served as an Executive Director with New Zealand based property group Chase Corporation and as a Non-Executive Director with several other listed companies in New Zealand and Australia. Glew has a Bachelor of Commerce. Seph is short for Joseph. (14.11.25).

Resources

Hot Chili (ASX: HCH)

About Hot Chili: Hot Chili Ltd (ASX: HCH) is advancing the Costa Fuego copper-gold project in Chile, a coastal hub that combines the Cortadera porphyry discovery with the Productora deposit and related infrastructure options. Its assets are positioned in the Atacama region near existing roads, power, ports and a desalinated water corridor, supporting a development model aimed at producing copper concentrate with gold credits. Exploration, resource definition, engineering and permitting work are directed toward building a large-scale, long-life copper business, while nearby holdings such as the Huasco Water project add strategic value for future mine and regional water supply solutions. Exposure is geared to copper demand from electrification and grid investment, with gold providing by-product support. Hot Chili's role in the market is that of a listed copper developer seeking to convert a sizeable Chilean resource base into an integrated mining operation with export access on the Pacific coast. (28.04.26).

About Roberto de Andraca Adriasola. Roberto de Andraca Adriasola has been a director of Hot Chili (ASX: HCH) since August 2013. De Andraca is a business manager with 25 years' experience in the financial and mining business. He has been Vice President of Business Development at Grupo CAP SA (BCS: CAP), Chile's main iron ore and steel producer, since 2006, and a member of its board of directors since April 2017. At CAP, De Andraca oversaw the construction of the first desalination plant dedicated 100% to producing water for mining companies in the north of Chile. Roberto de Andraca Adriasola is the son of Roberto de Andraca Barbas, the founder of CAP, who presided over the company for 25 years until April 2017. De Andraca Adriasola has finance experience working at Chase Manhattan Bank, ABN Amro, and Citigroup, working both in Chile and in New York. De Andraca was educated at the International School Nido de Aguilas in Santiago and at the University of Santiago, where he graduated in 1991 with a Bachelor of Business Administration. He has an MBA from Adolfo Ibanez University in Santiago. (09.07.24).

Pacific Lime and Cement (ASX: PLA)

This company was discussed in [Featured Articles](#) on page 19.

Why this was featured: 0.03x significance + mixed technicals alongside a HOLD bias.

About Pacific Lime and Cement: Pacific Lime and Cement (ASX: MRL) holds interests in lime and cement materials in Papua New Guinea, where its key asset is the Central Lime Project near Port Moresby. That project is based on limestone resources intended to support domestic production of quicklime, hydrated lime and related industrial inputs used in mining, construction and infrastructure. The group also has exposure to cement and downstream building materials opportunities linked to local supply chains, reflecting demand for basic construction products within Papua New Guinea rather than reliance on imports. Its operating profile is tied to industrial minerals, quarrying, processing and the potential development of manufacturing capacity close to end markets. Pacific Lime and Cement's market role is as a resource and materials developer seeking to convert limestone deposits into essential products for industry and building activity, with value linked to resource quality, logistics, permitting and execution in Papua New Guinea. (28.04.26).

Trek Metals (ASX: TKM)

About Trek Metals: Trek Metals (ASX: TKM) is a mineral exploration business with a lead focus on the Christmas Creek gold project in the Kimberley region of Western Australia. Its work is directed at identifying and advancing gold targets through geological mapping, geochemical sampling and drilling across tenure considered prospective for intrusion-related and structurally controlled mineralisation. Beyond Christmas Creek, Trek Metals holds additional exploration ground in Western Australia and applies a project generation model aimed at building value through discovery, technical de-risking and, where appropriate, partnering or asset transactions. Earnings are not derived from operating mines, so its position in the market depends on exploration success, tenure management and the ability to progress targets toward resource definition. This places the group among junior ASX-listed explorers seeking exposure to gold and other minerals through early-stage ground selection and systematic field programs in established mining jurisdictions. (28.04.26).

Leibowitz was Chairman of Ensurance (ENA) from October 2017 to November 2023. Leibowitz has over 30 years of corporate finance, investment banking and broad commercial experience and has a proven track record of providing the necessary skills and guidance to assist companies grow and generate sustained shareholder value. His previous roles have included Chandler Macleod (CMG) and Pilbara Minerals (PLS), where as Chairman and an early investor in both companies, he was responsible for substantial increases in shareholder value and returns. Between July 2002 and December 2006 Leibowitz as Chairman oversaw the restructuring of Tradehouse International, a receivables management business, into Chandler Macleod, one of Australasia's largest and most diverse HR outsourcing and recruitment companies, and Australia's second largest listed company in its sector, via a back-door listing in 2005. Later, Leibowitz teamed up with geologists John Young and Neil Biddle to create Pilbara Minerals (PLS). Leibowitz joined the board in May 2013 and the company, then a listed shell capitalised at less than \$10m, acquired the company-making Pilgangoora project in

The Insider Trader

2014. Leibowitz left Pilbara in June 2016. In 2017 the same team took the sub-\$30m Spitfire Minerals and restructured it into Bardoc Gold (BDC). Leibowitz was Chairman from March 2019 before its April 2022 acquisition by St Barbara. Prior to his corporate career Leibowitz was a global partner at PwC, where he specialised in corporate finance, M&A, and lead advisory. In this role, he has advised major banks, financial institutions, and large national and international companies. Leibowitz is a keen bridge player. A son is Matt Leibowitz, co-founder of online broker Stake. Leibowitz is a Fellow of the Institute of Chartered Accountants in Australia. (12.12.24).

Critica (ASX: CRI)

About Critica: Critica (ASX: VMS) is developing the Jupiter rare earth project in Western Australia, a clay-hosted deposit centred on rare earth elements used in permanent magnets and other advanced technologies. Its work is directed at defining and advancing Jupiter as a potential source of neodymium and praseodymium-rich material, with emphasis on metallurgy, resource evaluation, extraction pathways and development planning suited to ionic adsorption clay style mineralisation. Beyond Jupiter, Critica has exposure to other mineral interests in Western Australia, reflecting a broader exploration and project generation capability within the resources sector. The business is positioned at the upstream end of the rare earth supply chain, where value depends on geological quality, processing characteristics and the ability to move discoveries toward commercially viable production. Operations therefore combine exploration, technical studies, tenure management and corporate partnering aimed at turning mineral ground into development options with strategic relevance to specialty metals markets. (28.04.26).

About Ben Ackerman. Dr Ben Ackerman has been an Executive Director of Kalamazoo Resources (ASX: KZR) since November 2025. Dr Ackerman is an exploration geologist who brings over 25 years' experience in gold and copper exploration, and resource assessment. From the early 2000s at Newcrest, Dr Ackerman carried out various exploration management roles, including as Newcrest's Regional Exploration Manager in the Asia Pacific (APAC). During this time, Dr Ackerman led Newcrest's APAC Regional Exploration portfolio including acceleration of advanced projects (Havieron, and Telfer resource growth), brownfields growth portfolios across Telfer and Cadia, greenfields project capture and discovery programs, and exploration project generation across the APAC region. Since Newmont's takeover of Newcrest in 2023, Dr Ackerman has held the role of Regional Exploration Director for the APAC Region, leading exploration teams across the region with extensive experience building high-performing teams across multi-jurisdictional environments. This includes lead delivery of near mine and brownfields growth across Newmont's operations in APAC, including Cadia, Boddington, Tanami, Lihir and Telfer. Dr Ackerman has a Doctor of Philosophy (Economic Geology, Exploration Geochemistry) and Bachelor of Science (First Class Honours) and is a member of the Society of Economic Geologists, Australian Institute of Geoscientists and the Australasian Institute of Mining and Metallurgy. Nico Resources (ASX: NC1)

About Nico Resources: Nico Resources is a mineral exploration and development company focused on nickel and cobalt sulphide projects. Its core asset is the Wingellina Nickel-Cobalt Project, one of the larger undeveloped laterite nickel-cobalt deposits, where it is advancing studies, approvals and financing pathways toward development. The company's activities centre on resource definition, metallurgical work, mine planning and project optimisation to support a future mining and processing operation producing nickel and cobalt products for battery and industrial markets. Nico Resources currently generates little or no operating revenue, with value tied to de-risking the asset, securing development capital and progressing toward commercial production or potential strategic transactions.

Oil and gas

Amplitude Energy (ASX: AEL)

This company was discussed in [Featured Articles](#) on page 17.

Why this was featured: 0.00x significance + mixed technicals alongside a SELL bias.

About Amplitude Energy: Amplitude Energy (ASX: COE) is an energy producer with its principal interest in the Athena gas field in the offshore Otway Basin, supplying east coast demand through established basin infrastructure. Its asset base has included interests in the Casino, Henry and Netherby gas fields and associated processing and transport arrangements in the Otway region, where output is linked to domestic gas and condensate sales. The business combines upstream development, production and reservoir management with marketing into the local gas market, giving it exposure to both field performance and regional energy pricing. Alongside operated and non-operated positions, it evaluates nearby exploration and appraisal opportunities that can extend field life or add reserves around existing hubs. With operations tied to the Otway Basin and broader east coast gas network, Amplitude Energy occupies a niche as a domestic-focused supplier of conventional gas and liquids to commercial and industrial customers and energy retailers. (28.04.26).

About Gary Gray. The Hon. Gary Gray AO has been a director of Amplitude Energy (ASX: AEL) and of Civec (ASX: CVL) since October 2024. Gray was a Labor Member of the House of Representatives in the Australian Parliament as Member for the Western Australian division of Brand from 2007 to 2016. In the governments of Prime Ministers Julia Gillard and Kevin Rudd he was briefly Minister for Small Business, Minister for Tourism and Minister for Resources and Energy from March 2013 to September 2013 when the second Rudd government was defeated in that month's Australian federal election. Gray remained on the Opposition front bench until 2016. He chose not to contest the 2016 Australian federal election. Prior to entering Parliament, he spent 16 years as an official of the Australian Labor Party, rising to be National Secretary from 1993 to 2000. He was Executive Director of the Western Australian Institute of Medical Research in

The Insider Trader

2000 and 2001 and a Senior Executive at Woodside Energy from 2001 to 2007. After leaving Parliament he worked as General Manager of External Affairs at Mineral Resources (MIN) before serving as Australia's Ambassador to Ireland from 2020 to 2024. Gray has been a board member of the Australian Submarine Corporation, a member of the Independent Parliamentary Expenses Authority, a Trustee of Telethon and a board member of the Perth Astronomical Observatory. Gray has a Bachelor of Economics from the Australian National University. He was awarded the Centenary Medal in 2001. He was named an Officer in the Order of Australia in the Australia Day 2003 Honours List for service to the Australian Labor Party and to politics through the introduction of modern campaign techniques, fundraising protocols for all political parties, affirmative action guidelines, and by strengthening the Party's organisational and financial structure. Tamboran Resources (ASX: TBN)

This company was discussed in [Featured Articles](#) on page 21.

Why this was featured: 0.45x significance + fragile technicals alongside a HOLD bias.

About Tamboran Resources: Tamboran Resources (ASX: TBN) is developing the Beetaloo Basin gas resource in the Northern Territory, with the Shenandoah South area and the proposed Northern Territory LNG venture forming key parts of its asset base. Its acreage is aimed at supplying domestic gas and supporting future LNG sales, with work spanning exploration, appraisal, drilling and production planning in unconventional shale formations. The group holds interests across permit areas in the Beetaloo and pursues resource delineation, well performance improvement and infrastructure pathways needed to commercialise gas at scale. Operations combine subsurface evaluation, horizontal drilling and stimulation design, alongside engagement on processing, transport and market access options. Tamboran Resources' role in the basin is tied to opening a new upstream gas province and linking inland resources to industrial users and export channels, with value dependent on converting large prospective resources into sustained producing reserves and long-life supply. (28.04.26).

Materials Technology

Titomic (ASX: TTT)

About Titomic: Titomic (ASX: TTT) develops and commercialises Titomic Kinetic Fusion, a cold spray additive manufacturing process that uses high-velocity metal particles to build, coat and repair components without melting the feedstock. Its offering includes large-format metal additive manufacturing systems, robotic coating and restoration services, and related engineering support for aerospace, defence, mining, energy and industrial customers. Operations span equipment sales, contract manufacturing and surface engineering work, with capability applied to wear-resistant coatings, corrosion protection, part refurbishment and production of complex metal structures. Titomic also works with metals such as titanium and other industrial alloys, positioning its technology as an alternative to conventional welding, casting and subtractive machining in applications where material performance, reparability and component scale matter. The business sits at the intersection of advanced manufacturing and industrial services, with a model built around both hardware deployment and application-based manufacturing income. (28.04.26).

PPK Group (ASX: PPK)

About PPK Group: PPK Group (ASX: PPK) has roots in specialised manufacturing and now spans materials technology, safety products and industrial services, with a notable position in the development of boron nitride nanotubes through its involvement with BNNT technology. Its operations have included mining equipment and support services, alongside niche engineered products used in industrial and safety-critical settings. The group has also been associated with commercial pathways for advanced materials aimed at applications in composites, batteries, electronics and thermal management, reflecting a mix of established industrial capability and longer-horizon technology exposure. Historically, earnings have been supported by operating businesses serving coal and industrial customers, while value creation also depends on progressing proprietary or aligned technologies toward broader adoption. This combination places PPK between traditional engineering supply and emerging materials commercialisation, with its identity shaped by both manufacturing know-how and participation in advanced nanomaterials development. (28.04.26).

Industrials

Wagners (ASX: WGN)

This company was discussed in [Featured Articles](#) on page 23.

Why this was featured: 0.06x significance + mixed technicals alongside a BUY bias.

About Wagners: Wagners Holding Company (ASX: WGN) operates integrated construction materials, services and composite technologies businesses, anchored by its Wellcamp concrete plant and quarrying, cement, fly ash and transport operations in Queensland. Its construction materials division supplies concrete, aggregates, sand and cementitious products, while bulk logistics and road freight support internal distribution and external customers. In infrastructure services, Wagners provides crushing and screening, civil construction, contract mining, earthworks and mobile concrete plants for public and private projects. A distinguishing capability sits in New Generation Building Materials, including Earth Friendly Concrete, a geopolymer concrete used in pavements, bridges and precast applications, together with reinforced concrete pipe and precast products. The group also develops composite fibre technologies, producing airport and utility infrastructure products such as the CFT runway beam, guardrail, poles and bridge components, serving domestic and export markets from a diversified industrial base. (28.04.26).

Cuscal (ASX: CCL)

About Cuscal: Cuscal (ASX: CCL) provides payments and regulated banking services, with core platforms spanning card issuing, acquiring, settlement, clearing and real-time payments for banks, mutuals, fintechs and enterprise clients. Its infrastructure connects customers to BPAY, direct entry, ATM and eftpos networks, and to the New Payments Platform, where Cuscal supports payment processing and access services used by institutions that do not maintain their own large-scale rails. The group also offers digital wallets, fraud and dispute services, agency arrangements, and transaction and savings accounts that support white-label or embedded banking propositions. Operations are centred on institutional clients rather than retail distribution, giving smaller authorised deposit-taking institutions and fintech brands a route to payments capability and regulatory banking functionality without building the full stack themselves. This role positions Cuscal as an enabling wholesale provider within the domestic payments ecosystem and broader banking services market. (28.04.26).

Omni Bridgeway (ASX: OBL)

About Omni Bridgeway: Omni Bridgeway is a litigation finance and legal risk management company that funds and manages claims, arbitrations, and enforcement actions in exchange for a share of case proceeds. Its core assets are a diversified portfolio of funded investments across commercial litigation, arbitration, insolvency and recovery matters, plus embedded case origination, underwriting and portfolio management capabilities. The business operates through committed capital vehicles, balance sheet investments, and fund management structures. It makes money by deploying capital into meritorious legal claims, earning returns when cases settle or judgments are collected, and generating management fees and performance fees from third-party capital invested in its litigation funding portfolios.

Solvar (ASX: SVR)

About Solvar: Solvar (ASX: MNY) provides consumer motor vehicle finance and secured finance, with operations built around loan origination, lending and servicing in New Zealand and automotive retail finance in parts of Europe. Its New Zealand activities include lending for used cars, motorcycles, boats and caravans, supported by dealer relationships and direct channels, while its European footprint includes automotive point-of-sale finance and related credit products. The group also undertakes wholesale and inventory-style funding connected to vehicle dealers in markets where it operates, adding another income stream alongside interest and fee earnings from its consumer book. Funding is supported by warehouse structures and term debt facilities suited to receivables-based lending. Solvar's role in the market is that of a specialist non-bank financier serving borrowers and dealers who value speed, credit assessment expertise and flexible underwriting across transport-related assets and adjacent secured lending segments. (28.04.26).

Fiducian Group (ASX: FID)

About Fiducian Group: Fiducian Group provides financial planning, investment platforms, funds management and technology services to advisers and retail clients. Its core assets are the Fiducian Financial Services dealer group, the Fiducian Investment Platform, in-house managed funds and separately managed account capabilities, and proprietary planning and administration software used across its adviser network. The group earns recurring revenue from platform administration fees, funds under management and advice-related fees, supplemented by software, licensee and service income. Its vertically integrated model links client advice, portfolio construction, custody/administration and reporting, allowing it to capture economics across the wealth management value chain while supporting aligned financial advisers and their clients.

About Sam Hallab. Sam Hallab has been a director of Fiducian Group (ASX: FID) since August 2016. He was a director of Ensurance (ENA) and its CFO from July 2021 to November 2022. Hallab brings extensive financial experience, having spent more than 35 years in the financial sector where he held both executive and board positions. He spent eight years at PKF and 12 years at Sothertons Chartered Accountants, 10 of which as an audit partner. This was followed by almost 13 years as Deputy CEO of Australian Catholic Super. Hallab has a Bachelor of Economics majoring in Accounting and Law from the University of Sydney. Sam is short for Samir. (26.02.25).

About Indy Singh. Indy Singh OAM co-founded Fiducian Group (ASX: FID) in 1996 and remains its Executive Chairman. Before Fiducian he spent over eight years with one of Australia's largest financial planning and investment management companies, where he played a key

The Insider Trader

role in the development and management of its funds management and research businesses. Singh has been a driving force and founder of the charity, Vision Beyond AUS, which provides free eye surgery to the poor in developing countries, including India, with the target of giving sight and thereby a better life to over 100,000 people. Singh has a Bachelor of Technology, a Master of Commerce and a Diploma of Financial Planning. He is a Certified Financial Planner, an Associate member of FINSIA and of the Association of Superannuation Funds of Australia. Singh was awarded an Order of Australia Medal (OAM) in the Australia Day 2020 Honours List for service to the international community through eye care programs. Indy is short for Inderjit. (11.06.25).

Intelligent Monitoring Group (ASX: IMB)

About Intelligent Monitoring Group: Intelligent Monitoring Group (ASX: TPS) provides monitored security, fire and risk management services built around a national network of control rooms and field operations. Its platform combines alarm monitoring, video verification, patrol response, access control, CCTV, intrusion detection and fire systems for commercial, government and residential customers. Brands and operations in the group include monitoring and response services as well as electronic security installation, maintenance and remote site supervision, with recurring income supported by long-term customer relationships and contracted monitoring connections. The business also supplies personal emergency response and lone worker solutions, extending its role beyond traditional premises security into duty of care and community safety applications. Scale, installed infrastructure and integration capability support cross-selling across monitoring, installation and service work, while broad geographic coverage helps IMG serve multi-site clients that require consistent standards, central oversight and rapid incident escalation across Australia and New Zealand. (28.04.26).

Frontier Digital Ventures (ASX: FDV)

About Frontier Digital Ventures: Frontier Digital Ventures (ASX: FDV) builds, owns and operates online classified marketplaces, with major positions in property portals such as Zameen in Pakistan and iMyanmarHouse in Myanmar, alongside automotive and general classifieds interests across emerging markets. Its model combines controlling or influential stakes, operational support and technology to help category-leading platforms grow audience, listings, agent and dealer relationships, and digital monetisation. The group is best known for backing marketplaces in frontier and developing economies where internet adoption and formal online advertising penetration can expand over time. Earnings are shaped by listing products, subscriptions, lead generation, display advertising and other marketplace services sold to real estate agents, developers, vehicle dealers and businesses seeking online reach. Frontier Digital Ventures' role spans portfolio governance, product development, data use, marketing discipline and commercial know-how, aiming to strengthen network effects and market leadership in local classifieds ecosystems. (28.04.26).

About Patrick Grove. Patrick Grove has been Chairman of Frontier Digital Ventures (ASX: FDV) since June 2025 and a director since April 2025. He has been a director of Freelancer (ASX: FLN) since June 2024. He was a director of iCar Asia (ICQ) from June 2012 to February 2022 when Carsome Group acquired the company. Grove is Chairman and CEO of Catcha Group. Since founding Catcha in 1999, Grove has built an extensive track record of founding, building, acquiring, listing and growing both private and public Southeast Asian digital businesses. Today, he is widely recognised as one of the leading entrepreneurs in the region, having founded and taken six digital businesses from their early stages to IPO in Australia and Southeast Asia, including the iProperty Group, which was acquired by REA Group in 2016 in one of the largest ever acquisitions of a Southeast Asian internet company at the time. Another IPO was iCar Asia, an

The Insider Trader

operator of leading automobile marketplaces which on its merger with Carsome created Malaysia's first unicorn. Still another was Frontier Digital Ventures, an owner and operator of leading online marketplaces in frontier markets. In February 2021 Catcha raised US\$300m for a NYSE listed SPAC looking for opportunities in emerging markets. In August 2023, the SPAC announced a merger agreement with Crown LNG. Grove is passionate about leveraging Catcha's entrepreneurial and capital markets expertise to help great tech entrepreneurs scale and take their companies to the public markets. He has been independently and widely recognised by a number of international awards, including Global Leader of Tomorrow by the World Economic Forum; New Asian Leader by the World Economic Forum; Young Entrepreneur of the Year by the Australian Chamber of Commerce, Singapore; Asia's Best Young Entrepreneur by Bloomberg Business; and the University of Sydney's 2021 Alumni Award for International Achievement. Grove has a Bachelor of Commerce majoring in Accounting and Finance from the University of Sydney. (04.04.25).

About Luke Elliott. Luke Elliott has been a director of Frontier Digital Ventures (ASX: FDV) since April 2025. He was a director of iCar Asia (ICQ) from April 2012 to February 2022 when Carsome Group acquired the company. Elliott is a co-founder of Frontier Digital Ventures and a co-founder and current Executive Director of Catcha Group, one of Southeast Asia's most dynamic investment groups. He has over 25 years of experience developing fast-moving online business models, monetising online assets and executing corporate transactions including M&A, capital raisings and public listings. Elliott has a Bachelor of Commerce in Finance from the University of Sydney. Luke is short for Lucas. (14.07.25).

DGL Group (ASX: DGL)

About DGL Group: DGL Group (ASX: DGL) operates a specialty chemicals and dangerous goods logistics network spanning chemical manufacturing, warehousing, transport and waste treatment. Its operations include formulation and blending of industrial and agricultural chemicals, packaging and storage of hazardous materials, and transport services designed for regulated substances. The group also provides environmental solutions, including waste handling, treatment and disposal for chemical and industrial customers, giving it exposure across the life cycle of hazardous products. Facilities across Australia and New Zealand support customers in sectors such as agriculture, mining, manufacturing and infrastructure, with integrated capabilities that link production, compliance, distribution and disposal. This combination positions DGL as both a chemical processor and a logistics and environmental services provider for clients that require specialist handling, licensing and safety systems rather than standard freight or general warehousing. The business model is built around recurring service demand in regulated markets with high operational requirements. (28.04.26).

Frontier Energy (ASX: FHE)

About Frontier Energy: Frontier Energy (ASX: SUP) is advancing the Bristol Springs Solar Project near Waroona in Western Australia, a large-scale renewable energy development designed to supply electricity into the South West Interconnected System. Its landholding in the Waroona area gives it a defined development base, with work spanning project design, approvals, grid connection, power marketing and the commercial steps needed to bring utility-scale generation into operation. Frontier Energy also holds coal assets at the Bristol Springs project area, though its identity is now primarily linked to solar development and electricity market participation. The business is positioned around adding new generation capacity in a region with established transmission infrastructure and industrial power demand, while maintaining optionality over its broader energy asset base. Value creation depends on progressing permitting, engineering, financing and offtake arrangements for a grid-connected project with a clear geographic focus in Western Australia. (28.04.26).

NobleOak (ASX: NOL)

About NobleOak: NobleOak (ASX: NOL) is a life insurer built around direct-to-consumer life risk products, with NobleOak Life and other cover types including income protection, trauma and total and permanent disability insurance forming its core offering. The business distributes policies through online and phone channels under the NobleOak brand and also provides white label and partner solutions for affinity groups, associations, superannuation funds and other intermediaries. Its operating model combines digital customer acquisition, in-house underwriting and policy administration, giving it control over pricing, service and claims management across the insurance value chain. Earnings are supported by premiums written on long-duration protection products rather than reliance on physical assets, and market positioning rests on a low-overhead direct platform alongside institutional distribution relationships. NobleOak's role in the market is that of a specialist retail life insurance provider serving individuals and partner networks across Australia. (28.04.26).

3P Learning (ASX: 3PL)

About 3P Learning: 3P Learning develops and licenses subscription-based online education software for schools, teachers, students and parents. Its core products include Mathletics for curriculum-aligned mathematics practice, Reading Eggs and Reading Eggspress for literacy, and related assessment and intervention tools that support classroom instruction and home learning. The company's assets are its proprietary learning platforms, curriculum content, question banks, student performance data and long-standing school relationships. 3P Learning operates a SaaS model, generating recurring revenue from school and family subscriptions, multi-seat licences and renewals, with usage-driven retention supported by teacher dashboards, progress tracking and personalised learning pathways.

About Matthew Sandblom. Matthew Sandblom has been Chairman of 3P Learning (ASX: 3PL) since August 2021 and a director since May 2021. He was Executive Chairman from August 2021 to September 2025. Sandblom is an education entrepreneur with over 30 years of experience building successful companies. He started his first company, Pascal Press, in 1989 to publish school workbooks and study guides. Since then, he has founded or co-founded many successful companies including Blake Education, Clickview, 3P Learning and Blake eLearning. Sandblom is driven by the idea of producing resources for students that deliver on the promise that they provide better ways to learn than other products. Sandblom co-founded 3P Learning in 2003 to develop Mathletics, an online maths solution which

The Insider Trader

dominated primary schools in Australia, the UK, and parts of the EMEA region. He moved on in 2014 but returned in 2021 when 3P Learning merged with Blake Education. Sandblom was educated at Fort Street High School in Sydney and at the University of Sydney, where he graduated in 1982 with a Bachelor of Economics. (01.03.25).

Sportshero (ASX: SHO)

About Sportshero: Sportshero (ASX: SHO) develops and operates mobile and online sports prediction games that let users forecast match results and player outcomes in a social, free-to-play format. Its SportsHero platform has been built around major leagues and events, combining fan engagement features such as leaderboards, community interaction and rewards with digital advertising and brand partnership opportunities. The business has positioned its product at the intersection of sports media, gaming and fan communities, aiming to increase user activity through repeat participation rather than conventional wagering. Operations are oriented toward app-based delivery and scalable digital distribution, with content and gameplay mechanics designed to suit football and other widely followed sports. Sportshero's role in the market has been to offer a gamified prediction environment for sports fans and to package that audience for media, sponsorship and promotional uses across multiple territories where mobile sports consumption is strong. (28.04.26).

Environmental Clean Technologies (ASX: ECT)

About Environmental Clean Technologies: Environmental Clean Technologies (ASX: ECT) is developing the Coldry process, a low temperature dewatering method designed to convert high moisture lignite into a denser, transportable fuel product. Its lead asset base has been associated with lignite resources in Victoria, where the technology has been advanced for application to brown coal upgrading. ECT has also worked on Matmor, a waste derived ironmaking approach intended to use Coldry product and lower grade ore in a furnace based process aimed at reducing reliance on conventional coking coal pathways. The group's activities extend to intellectual property development, process engineering, pilot and demonstration scale validation, and commercial structuring with industry and project partners. Its market role sits at the intersection of energy efficiency, resource upgrading and lower emissions industrial processing, with value tied to licensing, project participation and deployment of proprietary coal and metallurgical technologies in suitable jurisdictions. (28.04.26).

WT Financial Group (ASX: WTL)

About WT Financial Group: WT Financial Group (ASX: WTL) operates a national wealth advisory and financial services network serving advisers and clients across personal financial planning, investment advice, superannuation, retirement income, insurance and mortgage broking. Its model combines self-employed and employed adviser practices with licensee, compliance, education, business support and technology services, helping advisers run client-facing businesses under aligned operating frameworks. The group has been associated with the Wealth Today and Sentry advice brands and also participates in dealer services and adviser support functions that span practice development, governance and administration. Earnings are tied to recurring advice-related fees, product distribution, lending activity and service arrangements with advisers, giving the business exposure to household wealth management rather than manufacturing financial products itself. Within the local advice market, it occupies the role of a scaled distribution and support platform for financial advisers seeking licensing and back-office capability. (28.04.26).

Microcap Technology

Talius Group (ASX: TAL)

About Talius Group: Talius Group (ASX: HSC) supplies technology-enabled health care products and services built around Talius Smart Care, a monitored independent living and aged care platform. Its offering combines personal emergency response, fall detection, home sensors, wearable devices, nurse call functionality and software that supports resident safety, staff workflows and family visibility in retirement living, aged care and community care settings. Operations span the design, sale, installation, monitoring and support of these systems, with recurring income from subscriptions, monitoring and service arrangements alongside hardware and implementation work. The business also provides communication and engagement tools used by care providers and accommodation operators to improve responsiveness and oversight across dispersed sites. Positioned in the care technology market, Talius Group serves organisations seeking to help older people remain safer and more connected while giving providers practical data, alerts and operating efficiencies across home and facility environments. Microcap Resources

Southern Hemisphere Mining (ASX: SUH)

About Southern Hemisphere Mining: Southern Hemisphere Mining (ASX: SUH) is an exploration group centred on the Llahuin copper-gold-molybdenum project in central Chile, where it has defined a mineral resource and pursues further drilling, geological modelling and development studies. Llahuin is a porphyry system with copper as the principal metal and gold and molybdenum credits, giving the business exposure to metals used in electrification and industrial supply chains. Its work involves target generation, resource growth, metallurgical assessment, environmental and permitting activities, and evaluation of processing and mine development options suited to a Chilean setting. Southern Hemisphere Mining also holds interests in nearby exploration ground that can support district-scale upside around its core asset. With operations anchored in an established mining jurisdiction and value linked mainly to discovery, delineation and project de-risking, the group is positioned as a junior minerals developer focused on advancing a copper-dominant asset base in Chile. (28.04.26).

About Richard Caldwell. Richard Caldwell has been a director of Pengana International Equities (ASX: PIA) since October 2025 and of Southern Hemisphere Mining (ASX: SUH) since February 2021. Caldwell commenced his career as the sole graduate corporate finance intake at Citibank in Sydney. Citibank deployed him in risk management and foreign exchange trading roles. Later, Caldwell moved to JP Morgan, London and thrived in the excitement of international markets. At JP Morgan he was promoted to vice-president and supervised significant debt security trading, arbitrage and portfolio management operations across a broad spectrum of credits, from sovereign to junk, with a focus on risk management. In 1992, Caldwell returned to Citibank, Sydney in the role of Head of Fixed Interest Trading. In 1997, Caldwell resigned and transitioned to his original vocational calling and entered Australian stockbroking, ultimately as Head of Corporate Finance and Equity Capital Markets at Tricom where he grew the business from fledgling to 4th on the Australian equity issuance league tables. Here his advisory experience included financial institutions, media, renewable energy, resources, technology and transport. Caldwell

The Insider Trader

is considered widely experienced and knowledgeable across corporations law, capital markets and governance. In that context, he was invited to conceive and teach the Equity Capital Markets stream at Macquarie University. As an industry-based lecturer, Caldwell taught in the university's leading master's degree program throughout Australia and South-East Asia from 2004 to 2010. Since 2012, Caldwell has undertaken executive and non-executive roles in Australian ASX listed companies, including Greatcell Solar Ltd. Caldwell also enjoys not-for-profit roles. He was chair of the Medical Foundation, Sydney University (six years) and chair of Ascham School Foundation (eight years). Both foundations grew very significantly in FUM and projects during the periods of his stewardship. Caldwell was educated at The King's School in Sydney and at the University of Sydney where he graduated in 1984 with a Bachelor of Economics and a Bachelor of Laws. He has a Post Graduate Diploma in Finance from FINSIA. (26.10.25).

Truscott Mining (ASX: TRM)

About Truscott Mining: Truscott Mining (ASX: TRM) is a mineral explorer with interests centred on hard-rock lithium and gold in Western Australia, led by the Lucerne project in the Pilbara. The group's ground position targets pegmatite-hosted lithium systems and structurally controlled gold mineralisation, with work directed toward mapping, geochemical sampling, geophysics and drilling to define prospective zones. Its acreage sits in established mining regions where exploration can be assessed against known geological settings and nearby infrastructure. In addition to Lucerne, Truscott Mining holds other early-stage exploration tenure in Western Australia that broadens exposure across battery minerals and precious metals while remaining within familiar regulatory and operating environments. The business is positioned as a junior explorer seeking value through discovery, resource definition and project advancement, with outcomes shaped by geological interpretation, tenement management and disciplined field programs rather than operating mines or downstream processing. (28.04.26).

Battery Age Minerals (ASX: BM8)

About Battery Age Minerals: Battery Age Minerals (ASX: PF1) holds the Bleiberg zinc-germanium-lead project in Austria, a brownfields asset in the historic Bleiberg mining district where germanium is a notable critical mineral alongside base metals. Its asset base also includes hard-rock lithium interests in Argentina, giving exposure to battery minerals across both Europe and South America. The group's work is centred on mineral exploration, target generation and advancing tenure in jurisdictions with established mining histories or recognised lithium potential. Bleiberg provides leverage to metals used in specialty technology and energy-related applications, while the Argentina ground adds optionality to lithium discovery and development pathways. Value creation depends on exploration success, resource definition and the ability to position projects for development, partnership or transaction outcomes within critical minerals and battery materials markets. Its role in the market is that of a junior explorer seeking upside from early-stage and brownfields mineral assets with commodity relevance to electrification and advanced industry. (28.04.26).

49 Metals (ASX: 49M)

About 49 Metals: 49 Metals (ASX: 49M) is a mineral exploration group with exposure to battery and base metals, centred on copper and lithium prospects in North America. Its project base has included the North American Lithium Belt in James Bay, Quebec, where hard-rock lithium tenure sits within a district known for spodumene-bearing pegmatites, and a set of copper interests in Alaska. Work is directed toward identifying economic mineralisation through geological mapping, geochemical sampling, geophysics and drilling, with value tied to advancing targets from early-stage exploration to defined resources that may attract development, joint venture or sale interest. The business operates as a junior explorer rather than a producer, so its role in the market is to secure prospective ground, test mineral systems and build technical understanding around assets that fit electrification and industrial metal demand themes. Its exposure spans lithium and copper, giving it leverage to multiple commodity cycles while remaining focused on project generation and discovery. (28.04.26).

Macarthur Minerals (ASX: MIO)

About Macarthur Minerals: Macarthur Minerals (ASX: MIO) holds the Lake Giles Iron Project in Western Australia's Yilgarn region, comprising the magnetite-focused Moonshine deposit and the Ularring hematite deposit. The business is oriented to iron ore development, with tenements positioned near established mining infrastructure and intended to support production of iron concentrates and direct shipping ore where economics allow. Beyond Lake Giles, it has maintained interests in lithium exploration ground in Western Australia and in former gold and base metals areas in the Pilbara, while also retaining a small footprint in Nevada, United States, through legacy lithium acreage. Its role in the market is that of a mineral developer seeking to advance defined resources toward approvals, processing design, transport solutions and offtake pathways rather than operating diversified downstream businesses. Value therefore depends on resource delineation, project studies, permitting and access to export chains for bulk commodities. (28.04.26).

About Alan Phillips. Alan Phillips has been a director of Macarthur Minerals (ASX: MIO) since October 2017. Phillips has been a senior executive, director, and chairman of ASX, TSX-V, TSX and AIM listed companies over a period of 40 years. Phillips has experience in a broad range of industries, but predominantly in the mining and exploration of copper, gold, ethanol and iron ore and technology sectors. (16.06.25).

The Insider Trader

About Cameron McCall. Cameron McCall has been Executive Chairman of Macarthur Minerals (ASX: MIO) since October 2017. He was a Non-Executive Chairman from December 2015 and a Non-Executive Director from April 2015. McCall was a director of Infinity Mining (IMI) from February 2018 to September 2024. McCall has a wealth of experience across the financial services and commercial property industries within Australia and internationally. He has been providing investment advice, equity capital raising and share trading for over 17 years to corporate entities and private clients at Hartleys and Macquarie Bank. During his 40-year career McCall has built an extensive network of international and Australian based high net worth individuals and corporate entities. Since 2014 McCall has run his own corporate advisory business providing advice on asset acquisition and capital raising to international and Australian based organisations. (16.06.25).

Stavely Minerals (ASX: SVY)

About Stavely Minerals: Stavely Minerals (ASX: SVY) holds the Stavely Copper-Gold Project in western Victoria, anchored by the Thursday's Gossan prospect, where exploration has outlined porphyry-style copper-gold mineralisation and nearby intrusive-related targets. The group's ground position sits within the Stavely Arc, a belt regarded as prospective for copper, gold and associated base metals, and its work includes drilling, geophysics, geochemistry and target generation across a district-scale tenure package. In addition to Thursday's Gossan, assets have included the Fairview copper prospect and regional prospects within the same belt, giving exposure to both discovery drilling and follow-up evaluation. Stavely Minerals remains an exploration business rather than a producer, with value linked to defining mineral systems, testing extensions and assessing development potential in a part of Victoria that has seen renewed interest in undercover base metal exploration. Its role in the market is that of a junior explorer seeking economically significant deposits through systematic technical work. (28.04.26).

Athena Resources (ASX: AHN)

About Athena Resources: Athena Resources (ASX: AHN) is an exploration and development group best known for the Byro Iron Ore Project in the Mid West of Western Australia. Byro hosts magnetite and hematite iron ore prospects and underpins work aimed at defining mineral resources and identifying practical pathways to development in a district linked to export infrastructure. Beyond iron ore, Athena has held interests in base metals and gold exploration in Western Australia, reflecting a broader search for commodities with geological potential and commercial relevance. Its operating model is based on securing tenure, advancing geological interpretation through drilling and technical studies, and assessing processing, logistics and market options for mineral projects. The business sits in the junior resources segment of the ASX, where value depends on exploration success, resource delineation, permitting and partnering or transaction outcomes tied to its landholding and project inventory. (28.04.26).

About Peter Jones. Peter Jones has been Managing Director of Athena Resources (ASX: AHN) since February 2025. Jones is an experienced senior executive. Prior to joining Athena, Jones worked for more than a decade with Sinosteel Midwest in a range of management roles. Sinosteel is a major iron ore tenement holder in the Mid-West region of Western Australia focused on the development of iron ore projects including the Jack Hills Magnetite Project, the Weld Range Iron Ore Project, the Blue Hills Iron Ore Mine, and the Oakajee Port and Rail Project. Jones brings significant relevant experience in managing successful regional exploration programs, advancing and completing feasibility studies on Mid-West hematite and magnetite iron ore projects, and the execution of complex joint venture projects including managing native title and pastoral stakeholder negotiations and liaison with traditional owner groups. During his time with Sinosteel, Jones was responsible for managing and supporting exploration programs and the completion of feasibility studies with the budgets for these programs exceeding \$100m. These Mid-West projects included the Koolanooka Magnetite Project, the Blue Hills Iron Ore Project, the Jack Hills Magnetite Project, the Weld Range Iron Ore Project, and the Oakajee Port and Rail Infrastructure Project. From

The Insider Trader

2020 to 2025 Jones was responsible for the evaluation and execution of commercial arrangements for several Sinosteel projects in the Mid-West. Jones has a Bachelor of Commerce from the University of Melbourne and is a member of CPA Australia. (23.02.25).

Green & Gold Minerals (ASX: GG1)

About Green & Gold Minerals: Green & Gold Minerals is a mineral exploration company building a portfolio of precious- and technology-metals projects. Its existing focus is gold exploration, and the February 2026 acquisition of Future Facing Metals adds silver, copper, tin, gold and indium exposure, broadening the company's commodity mix toward metals used in both traditional mining and emerging industrial applications. GG1's operations centre on identifying, acquiring and advancing prospective ground through exploration programs designed to define drill targets and mineral resources. The company does not yet appear to be in production; it makes money by creating value through exploration success, project advancement, and potential farm-outs, asset sales, joint ventures or future mine development.

Strata Minerals (ASX: SMX)

About Strata Minerals: Strata Minerals (ASX: NKL) is a mineral exploration and development business with a principal interest in the Penny South Gold Project in Western Australia, near the producing Penny West gold mine and within the broader Youanmi greenstone belt. Its work is directed at identifying and advancing gold mineralisation through drilling, geological interpretation and resource definition over prospective tenements in a well-established mining jurisdiction. In addition to Penny South, the group has held exposure to other exploration ground in Western Australia, giving it leverage to precious metals discovery while remaining centred on early-stage project generation and technical evaluation. Earnings are not driven by operating mines; instead, value depends on exploration success, tenure management, compliance, and the ability to progress assets toward economic studies, partnerships or corporate transactions. That leaves Strata Minerals positioned as a small-cap explorer seeking to unlock upside from underexplored ground with known gold endowment. (28.04.26).

About Jonathan Downes. Jonathan Downes has been Chairman of Strata Minerals (ASX: SMX) since March 2021. He has been Managing Director of Dundas Minerals (ASX: DUN) since October 2025. He has been a director of Brightstar Resources (ASX: BTR) since May 2023 and of Cazaly Resources (ASX: CAZ) since November 2021. He was a director of Galena Mining (G1A) from 2016 to 2021 and King West Resources from 2019 until its 2023 merger with Brightstar Resources. He was a director of Ironbark Zinc (IBG) from 2006 to 2019. Downes has over 30 years of experience in the minerals industry and has worked in various geological and corporate capacities. He has experience in nickel, gold and base metals and has been intimately involved with numerous private and public capital raisings. Downes was Managing Director of Kaiser Reef (KAU) from February 2020 to October 2025. He founded that company and guided its transformation from an early-stage explorer to a robust gold producer with a strong asset base. Under his leadership, Kaiser Reef acquired key assets including the Maldon Goldfield, the Maldon Processing Facility, the A1 Gold Mine and the Henty Gold Mine in Tasmania. He also built a

The Insider Trader

portfolio of exploration opportunities, positioning the company with long-term growth. Downes has a Bachelor of Science majoring in Geology from the Australian National University and is a Member of the Australian Institute of Geoscientists. (11.10.25).

Miramar Resources (ASX: M2R)

About Miramar Resources: Miramar Resources (ASX: M2R) is a mineral exploration business best known for the Gidji Joint Venture near Kalgoorlie in Western Australia, where it is seeking gold along the Zuleika Shear close to established mining and processing districts. Its ground position includes targets interpreted from geochemistry, geophysics and aircore drilling, reflecting an exploration model aimed at concealed mineralisation beneath transported cover in the Eastern Goldfields. Beyond Gidji, Miramar also holds exposure to other exploration tenure in Western Australia and uses early-stage field programs, drilling and target generation to assess base metal and precious metal potential. Value depends on advancing prospective ground through systematic technical work, refining anomalies into drill-ready prospects and testing for discoveries that may attract development, joint venture or transaction interest. The business sits within the junior resources segment, where geological insight, land access and disciplined exploration execution are central to asset quality and future optionality. (28.04.26).

Exultant Mining (ASX: 10X)

About Exultant Mining: Exultant Mining (ASX: 10X) is an exploration issuer seeking value through early-stage mineral interests rather than operating mines or processing plants. Its work is directed toward identifying, securing and advancing prospective ground where geological interpretation, field programs and follow-up drilling can define targets for further development or partnership. The business model is typical of junior resources groups on the ASX, with emphasis on tenure management, technical assessment, staged exploration spending and preservation of optionality across its holdings. Cash generation does not come from mineral production; instead, outcomes depend on adding geological confidence, improving project quality and retaining exposure to discovery upside. Exultant Mining therefore sits within the speculative end of the mining sector, where progress is shaped by exploration success, access to funding, regulatory compliance and the ability to attract counterparties for joint venture, farm-in or corporate transactions as projects mature. (28.04.26).

Orbminco (ASX: OB1)

About Orbminco: Orbminco (ASX: WML) is a mineral exploration and development entity with exposure to base metals and other mineral opportunities, seeking value through the identification, acquisition and advancement of resource assets. Its work typically spans geological review, target generation, tenure management, field programs and technical studies aimed at defining mineral potential and supporting future project development pathways. The business model is tied to building and reshaping an exploration asset base, preserving optionality across prospective ground and using corporate transactions, partnerships or direct expenditure to move projects along the value curve. As with many junior resource groups, outcomes depend on exploration success, access to funding, statutory approvals and the ability to convert geological concepts into defined resources or commercial development options. Orbminco's place in the market sits within the early-stage resources segment, where project quality, technical execution and disciplined portfolio management are central to long-term shareholder value. (28.04.26).

Panther Metals (ASX: PNT)

About Panther Metals: Panther Metals (ASX: PNT) holds the Burtville East Gold Project in the Laverton gold district of Western Australia, where shallow high-grade gold mineralisation and historic workings define its best-known asset. The group also maintains exposure to base and precious metals through exploration ground in the Northern Territory and Western Australia, giving it a mix of gold and battery-metals prospects. Its work involves tenement management, geological mapping, geochemical sampling, geophysics, drilling and resource definition aimed at identifying economically mineable deposits. Value creation depends on advancing targets from early-stage anomalies toward delineated mineral resources and, where appropriate, partnering or corporate transactions to unlock project potential. Positioned within the junior minerals exploration segment, Panther Metals offers investors leverage to exploration outcomes in established mining jurisdictions with existing infrastructure, skilled services and active peer activity, while retaining flexibility across commodities and stages of project maturity. (28.04.26).

About Daniel Tuffin. Daniel Tuffin has been CEO of Panther Metals (ASX: PNT) since December 2021. He has been Technical Director of Cavalier Resources (ASX: CVR) since June 2022 and of Mt Malcolm Mines (ASX: M2M) since September 2021. Tuffin is a mining engineer with over 20 years' experience. He is the founder of Auralia Mining Consulting and has been Chairman since 2022, having been Managing Director from 2009 to 2022. Tuffin has worked on Kalgoorlie gold projects for Barrick Gold in various roles including Mine Surveyor, Production and Projects Engineer (SMP Fleets), Alternate Pit Superintendent, and Alternate Haulage Supervisor. He established successful private mining projects including co-founding the Kalgoorlie gold mining venture Rose Dam Resources, which to date has poured over 30,000 ounces of gold. The bulk of Tuffin's experience has been in gold, but he has also spent time on iron ore sites in the northwest of Australia, including Pannawonica, Tom Price and Marandoo. As well as projects for Panther and Cavalier, Tuffin has developed projects that were vended into Kingwest Resources and Tempus Resources. Tuffin has a Bachelor of Science majoring in Engineering and Mine

Microcap Oil and gas

Stonehorse Energy (ASX: SHE)

About Stonehorse Energy: Stonehorse Energy (ASX: SHE) has been associated with oil and gas exploration and production interests in the United States, with the Big Horse project in Texas recognised as a principal asset. Its activities have included seeking exposure to onshore hydrocarbon opportunities, assembling working interests, and evaluating development pathways aimed at commercial production from established petroleum provinces. Beyond a lead holding, the business has also assessed additional energy assets where geology, infrastructure access and operating scale can support value from appraisal, drilling and field development. Earnings potential is linked to reserves, production outcomes and commodity pricing rather than manufacturing or service contracts. In market terms, SHE sits among smaller listed energy explorers whose prospects depend on technical assessment, funding access, partner alignment and the ability to convert acreage positions into producing operations. That profile gives it leverage to upstream oil and gas outcomes while carrying the execution and resource risks typical of junior energy stocks. (28.04.26).

About Mike McFadyen. Mike McFadyen has been a director of Stonehorse Energy (ASX: SHE) since May 2024. McFadyen's extensive experience includes over three decades of direct involvement in the oil and gas industry, spanning both offshore and onshore exploration and production (E&P) as an executive and as a consultant. His tenure as Executive Vice President for Offshore at Murphy Oil before retiring in June 2020 marked a period of significant growth in the US Gulf of Mexico operations, increasing net production from 18 million barrels of oil equivalent per day (BOEPD) to 85 million BOEPD. McFadyen's journey in the industry began in 1991 with Texaco E&P in New Orleans, where he honed his skills in various operational, and project management roles. After joining Murphy Oil in 2002 as Drilling Manager in Kuala Lumpur he rose through the ranks to manage significant projects like the Kikeh Deepwater Development, which achieved peak production rates of 180 BOEPD. His leadership extended across North America as he oversaw major onshore projects and was promoted to Executive Vice President of EXPRO in 2011. Additionally, he has been involved with several key industry boards and committees, further

The Insider Trader

establishing his prominence in the energy industry. McFadyen has a Bachelor of Science in Petroleum Engineering from the University of Wyoming and has attended Advanced Management Programs at Harvard Business School and the Kellogg School of Management. (18.05.24).

Synertec Corporation (ASX: SOP)

About Synertec Corporation: Synertec Corporation (ASX: SOP) supplies engineering, systems integration and technology commercialisation services, with the Water Below product suite a recognised offering for remote water monitoring, treatment and asset management. Its work spans instrumentation and control, process engineering, digital systems and specialist consulting for clients in energy, water, resources, defence and transport infrastructure. Operations combine project delivery with proprietary technologies aimed at safety, efficiency and decarbonisation outcomes, including emissions monitoring and industrial automation applications. Synertec also develops and licences technologies from research and industrial partners, seeking pathways from prototype and validation to deployment in regulated and mission-critical environments. Earnings are supported by long-term customer relationships, technical capability in complex industrial settings and exposure to essential infrastructure operators. With roots in engineering services and a growing emphasis on commercial technology solutions, the business occupies a niche between consulting, integration and product-based industrial technology markets (28.04.26).

AF Legal Group (ASX: AFL)

About AF Legal Group: AF Legal Group (ASX: AFL) operates a law firm platform built around AF Legal, with services spanning personal injury, dispute resolution, family law, employment law, wills and estates, and commercial matters. Its practice base includes plaintiff and consumer-facing legal work alongside advisory services for businesses and private clients, giving the group exposure to both individual case matters and ongoing professional engagements. Operations are delivered through employed practitioners and specialist legal teams, with earnings shaped by a mix of fee-for-service work and matters that may conclude on settlement or judgment. The group participates in the legal services market as a listed professional services business, combining legal practice operations with central management, technology and compliance functions. Its role is to provide accessible legal representation and advice across common civil and commercial needs while maintaining the governance, risk management and professional standards required of a publicly traded legal group. (28.04.26).

Butn (ASX: BTN)

About Butn: Butn (ASX: BTN) provides funding and payment solutions built around small and medium enterprise trade activity, with invoice finance and debtor finance as its core products. The business advances working capital against approved receivables, helping clients smooth cash flow while waiting for customers to pay, and it combines funding with collections, account management and payment processing capabilities. Operations are oriented to business-to-business transactions rather than consumer lending, giving exposure to commercial invoices across a diversified customer base. Butn also offers a payments platform designed to support faster settlement and workflow efficiency for merchants and business users, extending its role beyond pure finance into transaction services. Its model relies on underwriting invoice quality, managing debtor performance and using technology to streamline onboarding, monitoring and administration. Positioned in the non-bank finance segment, Butn serves enterprises seeking flexible funding linked directly to sales and receivables rather than traditional secured lending. (28.04.26).

About Cameron Petricevic. Cameron Petricevic has been Chairman of Infinity Mining (ASX: IMI) since November 2025 and a director since April 2025. He has been Chairman of Butn (ASX: BTN) since February 2024. He has been a director of Vection Technologies (ASX: VR1) since January 2025 and of RocketBoots (ASX: ROC) since November 2021. He was a director of Commschoice Group (CCG) from December 2017 to November 2018. He was Chairman of Australia Primary Hemp (APH) from October 2019 to October 2020 and a director from June 2018 to June 2021. Petricevic has spent over 20 years in the financial industry and since 2015 has been a partner and director at Kentgrove Equity Partners Pty Ltd. He previously had roles at AXA Asia Pacific (now AMP) and Acorn Capital across the Asia-Pacific

The Insider Trader

region. Petricevic has extensive investment banking experience, including valuations, M&A, and portfolio management. Petricevic is a director and founder of several private companies. Petricevic founded Lucrum Ventures Pty Ltd and remains a director. Petricevic was educated at Penleigh and Essendon Grammar School in Melbourne and at the University of Melbourne, where he obtained a Bachelor of Commerce in Actuarial Studies and a Bachelor of Engineering with First Class Honours in Electrical Engineering in 2003. He is an Associate of the Institute of Actuaries of Australia and a Graduate member of the Australian Institute of Company Directors. (06.11.25).

About Stan Gordon. Stan Gordon has been a director of Butn (ASX: BTN) since September 2025. With over 35 years of comprehensive commercial experience across small to medium-sized enterprises, Gordon brings a strategic and forward-thinking approach to business development and branding. His innovative mindset, combined with a track record of successful brand acquisitions and operational leadership, enables him to craft tailored solutions that optimise business performance. In 2000, he diversified his portfolio by acquiring Mr Whippy, followed by investments in Pretzel World, Cold Rock Ice Creamery, and several other prominent FMCG brands. Gordon has established himself as a leading authority in the Australian franchising industry, leveraging his extensive network and deep industry insight to drive growth and innovation within the sector. (20.09.25).

About Rael Ross. Rael Ross co-founded Butn (ASX: BTN) with Walter Rapoport in 2018 and has been Executive Director and Joint CEO since September 2020. Ross has over 15 years' experience in financial services, technology and mentoring other start-ups. Ross has created, developed, and executed technology and digital projects through several start-ups. Ross co-founded Tsikot.com, one of the leading online automotive platforms and the largest online automotive forum in the Philippines. As a qualified accountant, Ross has worked in private practice, the not-for-profit sector and for Big Four accounting firms. Ross became entrepreneurial before he was in his mid-twenties. At 21, on a trip to the US, he noticed the success of charity silicone wrist bands. A week later, he had found a supplier and started selling bands to some of Australia's largest charities. Ross was awarded a full scholarship at Monash University, where he completed a Bachelor of Accounting. In 2020 and 2022, Ross was included in Business News Australia's Top 100 Young Entrepreneurs list. (25.04.24).

Investment

Future Generation Investment Company (ASX: FGX)

About Future Generation Investment Company: Future Generation Investment Company (ASX: FGX) is a listed investment vehicle that gives shareholders exposure to a diversified portfolio of Australian equities through allocations to selected external fund managers. Its structure is distinctive in the market because participating managers waive their usual management and performance fees, while a stream of fully franked dividends and capital growth remains the financial objective for investors. FGX invests across styles and market capitalisations rather than operating businesses directly, with holdings shaped by active stock selection from specialist managers. A defining feature is its philanthropic model: operating costs and an amount equal to 1.0% of net tangible assets each year are directed to youth mental health charities, including ReachOut Australia, The Black Dog Institute and headspace. This combines listed equity exposure, manager diversification and charitable giving within one ASX security, positioning FGX as both an investment company and a long-term social impact contributor. (28.04.26).

WAM Active (ASX: WAA)

About WAM Active: WAM Active (ASX: WAA) is a listed investment company managed by Wilson Asset Management that invests primarily in undervalued growth businesses listed on the ASX, with an emphasis on medium-sized enterprises and selective opportunities elsewhere in the market. Its portfolio is built through fundamental research, company meetings and active trading, seeking to benefit from price inefficiencies, corporate activity and changes in business quality over time. Holdings span sectors such as industrials, resources, healthcare, consumer and technology rather than a single operating asset, reflecting its role as an equities vehicle rather than an operating business. Income to support shareholder returns comes from dividends and realised gains on investments, while the structure provides investors with access to a professionally managed, concentrated exposure to listed shares through one ASX security. WAA sits within the broader Wilson Asset Management stable of listed investment companies and follows an active, benchmark-unaware style. (28.04.26).

Underwood Capital (ASX: UWC)

About Underwood Capital: Underwood Capital (ASX: MMJ) is an investment vehicle best known for exposure to regulated cannabis and adjacent sectors, holding listed and unlisted stakes rather than operating cultivation or retail assets directly. Its activities are centred on identifying businesses in medicinal cannabis, consumer products, biosciences and related industries where value can be created through equity ownership, selective disposals and corporate actions. The group has historically held interests in cannabis operators and investment entities with operations spanning North America and other regulated markets, giving it diversified participation across production, brands and downstream channels without relying on a single operating site. Income and asset value are therefore shaped by portfolio management, market pricing of investee holdings and monetisation of positions when appropriate. Underwood Capital's role in the market is that of a specialist listed investor offering shareholders indirect access to sectors that are often difficult to reach through direct ownership alone. (28.04.26).

Future Generation Global (ASX: FGG)

About Future Generation Global: Future Generation Global Investment Company (ASX: FGG) is a listed investment vehicle that gives shareholders exposure to a diversified portfolio of global equities managed by a group of established fund managers. Its mandate spans international shares across developed and other major markets, with managers contributing portfolio management services on a pro bono basis. The structure is distinctive in combining investment exposure with a philanthropic model, directing a portion of assets and earnings support to youth mental health charities. Holdings are spread across multiple external managers and styles, which reduces reliance on any single stock picker and provides access to different global investment approaches. Income is derived mainly from dividends, distributions and changes in the market value of the underlying share portfolio, while returns to investors are influenced by global equity market movements and the discount or premium of its share price to net tangible assets. (28.04.26).

WAM Leaders (ASX: WLE)

About WAM Leaders: WAM Leaders is an investment company that holds a concentrated portfolio of large-cap listed equities, primarily drawn from the S&P/ASX 200, using active stock selection and market mispricing analysis. Its assets are the shares and cash it manages on behalf of investors, with portfolio construction focused on established businesses the manager believes are trading below intrinsic value or facing temporary market dislocation. The company's operations centre on researching, buying, monitoring and selling listed securities to generate returns. It makes money through capital growth and dividend income from its portfolio investments, with shareholder returns supported by changes in net tangible assets and distributions funded from investment profits.

About Geoff Wilson. Geoff Wilson AO founded Wilson Asset Management in 1997 and remains its Executive Chairman. Wilson has over 40 years of experience in investment markets having held a variety of senior investment roles in Australia, the UK, and the US. Wilson created Australia's first listed philanthropic wealth creation vehicles - Future Generation Global Investment Company (ASX: FGG) and Future Generation Investment Company (ASX: FGX), of which he remains a director. Wilson is Chairman and Chief Investment Officer of WAM Capital (ASX: WAM), WAM Leaders (ASX: WLE), WAM Global (ASX: WGB), WAM Microcap (ASX: WMI), WAM Research (ASX: WAX), WAM Active (ASX: WAA), WAM Strategic Value (ASX: WAR) and WAM Income Maximiser (ASX: WMX) and is a Director of WAM Alternative Assets (ASX: WMA). He is also a director of the Staude Global Value Fund (ASX: GVF) and Hearts & Minds Investments (ASX: HM1). He has been a director of Keybridge Capital (ASX: KBC) since February 2025 and of Pengana International Equities (ASX: PIA) since October 2025. Wilson was named an Officer of the Order of Australia (AO) in the Australia Day 2018 Honours List for services to the business and finance sector, professional financial bodies, and the community as a supporter of charitable foundations. WAM Alternative Assets (ASX: WMA)

About WAM Alternative Assets: WAM Alternative Assets is an investment company that provides shareholders with exposure to alternative assets through a diversified portfolio of private equity, real assets, infrastructure, private debt and specialist fund investments. The company allocates capital across listed and unlisted vehicles, seeking returns from income, capital appreciation and portfolio realisations. Its assets typically include interests in external alternative fund managers, direct and indirect positions in private market strategies, and other non-traditional investments that broaden exposure beyond public equities. WAM Alternative Assets makes money from investment income, distributions, realised gains on asset sales and changes in the value of its portfolio, supporting dividend payments and net asset value growth.

WAM Strategic Value (ASX: WAR)

About WAM Strategic Value: WAM Strategic Value (ASX: WAR) is a listed investment vehicle within the Wilson Asset Management group that seeks to unlock value from undervalued and underappreciated small and mid-cap companies, often where corporate activity, balance-sheet change or market recognition may drive a re-rating. The portfolio spans listed securities and can include takeover targets, restructurings, demergers, recapitalisations and other special situations identified through active research. WAR is externally managed by Wilson Asset Management and gives shareholders exposure to a concentrated, opportunistic approach that differs from broad market index investing. Its role in the market is to provide access to event-driven and value-oriented ideas across the ASX, with an emphasis on preserving capital while pursuing medium-term upside from valuation gaps and corporate change. Returns are influenced by security selection, portfolio construction and the manager's assessment of catalysts that may close discounts to underlying value. (28.04.26).

WAM Income Maximiser (ASX: WMX)

About WAM Income Maximiser: WAM Income Maximiser is an investment company focused on generating monthly fully franked income and capital growth from a portfolio of listed equities and cash-generating market strategies. Its assets comprise securities selected by Wilson Asset Management, typically including high-conviction companies, dividend-paying stocks and positions structured to enhance portfolio income. The company operates through active portfolio management rather than through producing goods or services, reallocating capital across opportunities based on valuation, earnings outlook and income potential. It makes money from dividends and distributions received from portfolio holdings, realised and unrealised investment gains, and the disciplined management of capital to support regular shareholder distributions.

About The ASX Insider

The ASX Insider is brought to you by the team that founded Pitt Street Research in 2018 and Stocks Down Under in 2019, Marc Kennis and Stuart Roberts.

- Pitt Street Research is a Sydney-based equity research firm focused on ASX-listed small and mid-cap stocks. It produces detailed research reports that analyse companies' financials, strategy, catalysts, risks, and market context. This research is designed to help investors better understand companies that often receive little coverage from traditional brokers or sell-side analysts.
- Stocks Down Under is a leading source of actionable investment ideas, buy/sell commentary, weekly insights, market trends, and sector analysis for investors interested in ASX stocks.

Stuart Roberts

Stuart Roberts is the co-founder of Stocks Down Under. Previously, Stuart covered the healthcare and biotechnology sectors at NDF Research and at stockbroking firms Southern Cross Equities, Bell Potter and Baillieu Holst from 2002 to 2015, where he developed a reputation for detailed analysis on previously uncovered Life Science companies. In 2018, he co-founded Pitt Street Research.

Marc Kennis

Marc Kennis is the co-founder of Stocks Down Under and has 25+ years experience analyzing companies in a range of sectors, including Food & Beverage, Industrials, Technology, Medical Equipment, Telecom and Media. Prior to moving to Australia in 2014, he worked for a number of brokers and banks in The Netherlands, including ING and Rabobank. In 2018, Marc co-founded Pitt Street Research.

Nick Sundich

Nick Sundich has been an analyst at Pitt Street Research since January 2022. Before Pitt Street Research Sundich spent three years, from August 2018 to December 2021, as a journalist at the financial newspaper Stockhead. Sundich was educated at The Scots College in Sydney and at the University of Sydney where he graduated in 2018 with a Bachelor of Commerce degree and a Bachelor of Arts degree. Sundich has completed the CFA Investment Foundations program.

Charlie Youlden

Charlie Youlden has been an Associate Analyst at Pitt Street Research since June 2025. He previously served as a Portfolio Manager at Alpha Group, gaining hands-on experience in portfolio construction and risk assessment, and is also the Co-Founder of CHYLN Agency, a marketing and videography business he helped launch in 2022, where he led market research and performance-driven campaigns that generated over \$400,000 in new client revenue, reduced cost-per-lead by 69%, and scaled the business to \$13,000 in monthly revenue. Charlie holds a Bachelor of Business (Marketing and Finance) from University of Technology Sydney and completed a Value Investing program at Columbia Business School.
