STOCKS DOWN UNDER

INVESTOR NEWSLETTER 3 JUNE 2023

# Did you know ...

... that our Concierge subscribers just made **56.6% on Leo Lithium** (ASX:LLL) in only 3 weeks ?!

We put LLL on our Concierge BUY list on 8 May at 65 cents and sold on 31 May at 88.5 cents. We typically have a much longer holding period, but we don't shy away from taking a profit if the opportunity presents itself. Do your portfolio a favour and **try out Concierge** for yourself!

# Stock of the week: QANTAS (ASX:QAN)

## 5 reasons why Qantas thinks you should buy QAN shares

Should you buy Qantas shares? On one hand, there’s the common mantra that investors should never buy airlines, not to mention that the travel boom has little more room to grow and the share price is near pre-COVID highs.

But the Red Roo begs to differ. You see, the company held its first investor day since the pandemic and outlined several reasons why investors should consider it.

## China reopening stocks

China dropped its COVID-Zero policies back in January. And we think there are several ASX stocks with exposure to China that still have more upside to capture as diplomacy thaws after a rough few years. And we throw in a bonus stock!

## Stocks Down Under Insights

### Cooking the Books

Cooking the books is a term

### Lynch upgraded guidance

Lynch Group (ASX:LGL) hasn't

used to describe the illegal act of manipulating accounting records and financial statements in order to deceive others. This deception can be done for various reasons, such as hiding losses or inflating profits. But just how can companies 'cook the books'? There are several ways, but in this article we recap 4 of the most common ways companies do this.

Click here for the full story

been the hottest ASX stock by any means, but it just upgraded guidance for FY23 at a time when so many other companies are downgrading it. LGL has just been through Mother's Day, one of the biggest selling periods of the year. And demand in China rebounded following the country's re-opening as well as a reduction in freight costs due to increased aircraft capacity.
